

Please see attached Photos of the Mobile Medical Clinic project

The Rotary Club of Madurai Metrolis India and the Rotary Club of Kwinana entered into a Joint venture in May 2020, with the assistance of a Global Grant GG 2013563 to provide a mobile clinic vehicle, to be utilised in remote areas

Mobile medical clinics are customized vehicles that travel to the heart of rural communities and provide preventive and other health care services at the community's doorstep.

They overcome barriers of time & money and provide community tailored health care solution to the vulnerable section of the community.

Mobile clinics are equipped with a doctor, nurse and a nursing assistant trained in identifying symptoms of communicable and non-communicable diseases.

They can also be used for raising awareness, ensuring preventive vaccination and encouraging regular medical check-ups among rural communities.
