Sausage sizzles – First of the Year

Friday the 11/02/2022

Bert needs 3 helpers in the morning and 3 in the afternoon.

Please contact Bert if you are available

To finish on a positive note for 2021

On the last sizzle on the 27/12/2021. we raised \$ 918.- nett.

Our thanks go to the hard working teams of : Jennifer, Donna, Adrian, Alan G, Jeff, Bill W. Kirk and Bert himself.

Goldeen Wheels Villas History

The original Chairman of Golden Wheel Villas was developer Walter McIntosh, who hailed from Chicago. He was known to never take a backward step!

At the same time he was founding chairman of All Saints Anglican School during the design and construction phase. All Saints recently honoured his memory by naming their Admin building after him. His character is well illustrated by this extract from the headmaster's speech at the ceremony. :

“ Walter was a determined, energetic, creative visionary who was always direct in his approach. One never left an encounter with Walter wondering what he might be thinking. He was the perfect person to be our original Chair of the School Council. Walter got things done.”

Club members will recognise Walter in those words, and we can all be grateful for his legacy and that of his hard working secretary-treasurer Alan Hughes at Golden Wheel Villas.

Alan Midwood.

END POLIO NOW!

The DUKE

Starring Jim Broadbent and Helen Mirren

Event Cinema – Robina Town Centre
6.30pm arrival for a 7pm screening

Tickets \$20 each

BOOK NOW <https://www.trybooking.com/BWTSB>

The pride of Israel is that its technologies will be able to be used by all humanity:

1. Tel Aviv University is developing a nasal vaccine that will protect people from Alzheimer's and stroke.
2. The Technion, Institute of Technology (Haifa), has developed a simple blood test capable of detecting different types of cancer.
3. The Ichlov Center (Tel Aviv) isolated a protein that makes colonoscopy unnecessary to detect colon

cancer, with a simple blood test. Colon cancer kills about 500,000 people annually.

4. Acne doesn't kill, but does cause anxiety in teens. The Curlight Laboratory has created a cure. Emitting UV rays at high intensity, kills the bacteria that cause acne.

5. The Given Imaging Laboratory has developed a tiny camera in the form of swallowed pills and transmits thousands of photos of the digestive tract. These high-quality photos (2 per second for 8 hours) can detect polyps, cancers, and sources of bleeding. The photos are sent to a chip that stores them and sends them to a computer. At the end of the process, the chamber is eliminated via the rectum.

6. The Hebrew University (Jerusalem) developed an electrical neurostimulator (batteries) that is implanted in the chest of Parkinson's patients, similar to the pacemaker. The emissions from this device block the nerve signals that cause tremors.

7. The simple smell of a patient's breath can detect if a patient has lung cancer. The Russell Berrie Institute for Nanotechnology has created sensors capable of sensing and registering 42 biological markers that indicate the presence of lung cancer without the need for a biopsy.

8. Catheterization can be dispensed with in many cases. Endopat is a device placed between the indicator fingers, which can measure the state of the arteries and predict the possibility of a heart attack in the next 7 years.

9. The University of Bar Ilan studies a new drug that fights viruses through the bloodstream. It is called Vecoy Trap, as it tricks a virus into self-destruction. Very useful to combat hepatitis, and in the future Aids and Ebola.

10. Israeli scientists at Hadassah Medical Center (Jerusalem) may have discovered the first cure for amyotrophic lateral sclerosis, known as Lou Gehring's disease, in an Orthodox rabbi. Stephen Hawking, a famous British scientist, suffered from this disease and used methods invented by Israeli scientists to communicate.

You will never get this from main-stream media!
The world shouldn't live on bad news alone

Memories from the past

Our Entertainer for the night – Alan Midwood

Now I've heard Alan play the mouth organ before and he's always been good.

But on this night, he surpassed himself.

Alan you were brilliant and what a repertoire.

Thank you for the entertainment.

Before my surgery, the anesthesiologist offered to knock me out with gas or a boat paddle... It was an ether/oar situation.

I have a pencil that used to be owned by William Shakespeare.

But he chewed it a lot. Now I can't tell if it's 2B or not 2B.

I relabeled all of the jars in my wife's spice rack. I'm not in trouble yet....but the thyme is cumin.
