Dear All at Rotary Club of Taree,

Did you know that only one in four school-aged students receive a secondary education in Tanzania? By supporting St Jude's students into secondary school and beyond, you are helping to bridge this gap.

The Tanzanian Government announced last week that classes for Form 6 students will resume on June 1. This leaves our graduating class with less than one month to catch up on studies before their final exams. It will be an intense month for both teachers and students, and we need your help to ensure no student is left behind.

[Donate today](#)

By donating to our annual appeal today, you are helping A Level teachers race against time to prepare our Form 6 students so they thrive during their end of year exams. Your donation is not just a donation... it contributes to educating the rest of our secondary students, who remain at home due to COVID-19, relying on at-home study packs and practice exams carefully compiled by passionate academic staff. You are helping Tanzanian students to beat the odds.

Times may be tough, but I can assure you that your donation to St Jude's is worth it. See the difference it's making in the lives of our secondary school students by watching the video.

I also hope you enjoy reading the article below, echoing two students' tales of hope, and the lasting impact of a free, quality education on their lives. Our latest podcast episode is also out, and this month's guest is Philip, Head of Community Relations. Hear him describe his experience assembling the COVID-19 Family Care Packages, and the outpouring of gratitude from families. With a background in aviation, listen below as he speaks to me about his transition from planes to

people and making his dreams of helping the community a reality.

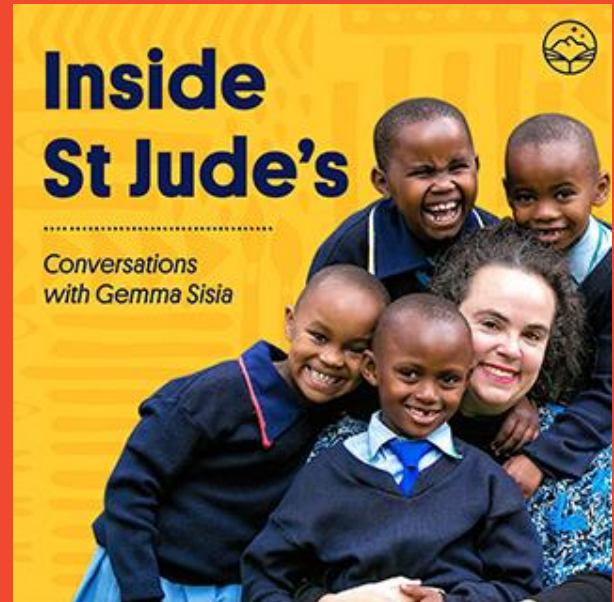

Stay safe,

Gemma

## Dreaming Big Because of You

See your impact on young Zahra and Christopher, two students with big dreams for their future as emerging Tanzanian leaders.

## Episode 5: Philip – Community Caretaker

Our Head of Community Relations speaks about his experience delivering the COVID-19 Family Care Packages and his realisation of the great need for them within the community.
