Rotary Australia World Community Service/Rotary of Taree

Dear **All**:

In April 1, 2020, I requested assistance in helping us, Quezon Province, Philippines to prevent the spread of the virus. We had 9 confirmed cases then and now we have 72 confirmed cases, 29% recovered and 10% died. By far, we have the lowest incidence rate for Region IVA (CaLaBaRZon). For our laboratory findings, out of the 1223 suspect cases, 75% tested negative for the virus.

We will try to maintain our low incidence and hopefully lessen our fatalities. Your donated Protective Personal Equipment (PPE) and disinfectants have helped us a lot in making sure our front liners and healthcare workers are safe and assured us of a better way to contain the virus. The provincial government of Quezon, under the leadership and administration of Governor Danilo E. Suarez, together with all of the constituents of our province, both public and private sectors extend our heartfelt gratitude to you and the community of which each of you represent. We thank our "kababayan", Dr. Grace Maano, for being our bridge, making sure that our immediate needs during this pandemic reach your hearts.

Attached are the photos, documents and receipts for your perusal.

Thank you very much.

Truly,

GRACE V. SANTIAGO, MD
Provincial Health Officer II
