“RISKS ON FINANCIAL INVESTMENTS”

“What is an investment?” Investment is time, energy or matter spent in the hope of future benefits actualized within a specified date or timeframe. Areas of investment are durable goods (gold, silver, etc.), real estate, industry, venture capital and financial products. Crypto currencies are not yet qualified under investments because of the huge volatility. Every investment is a RISK. The higher the return, the higher the risk.

PPres

The Do's and Don'ts are:

- Divide your money in 3 and keep one third in the bank.
- Divide all the investment amount in different baskets.
- Never borrow money to buy stocks or any other financial product
- If you invest in stocks, never buy only 1 type of shares
- Never buy impulsively
- Never put all of your money in one investment company or broker
- Do not interfere if you have no knowledge
- Work only with people you can trust
- Don't let yourself be pressured by others
- Never panic... have patience
- Take advice... better to pay a commission than to lose your money
- Prepare a plan
- Set and respect your limits
- Don't be greedy
- Never invest with money you might need tomorrow

Advice from Warren Buffet is:

- Invest in yourself!
- Cash is a BAD investment (surplus cash)
- Wait for the right pitch

- Invest in productive assets
- Stocks: Evaluate the company first, before you look at the price
- Accept your mistakes

President Erika presented the make-up list of members and the financial status of the club. **The total is Rp. 517,852,462.75.**
