Interesting anecdote pointed out by John Cropley that their first president Florstan Aguilar was also a surgeon dentist that had to attend Queen Maria Cristina which had a horrendous chariot accident in which she lost several teeth.

Her dentist Dr Highland, an American, was overseas at that time, suggested young Dr. Aguilar to attend the Queen as a matter of urgency.

She was so grateful for his services and named him Dentist to the Royal Household.

The good relationship the dentist had from thereon made it possible that a new academic career was created in 1901, an Odonatologist, as these had been called Surgeon Dentist not a university degree since 1875.

Dr. Florestan Aguilar and others founded the Rotary Club of Spain and became the first Governor.
