

Bulletin # 09 from 5th of September

Club Discussions

The meeting tonight was chaired by V.P John Stuhmcke. We had a rather good night despite the lack of formalities on the night. Catering at the club is now excellent and the fish and chips tonight were really a treat. There are a large number of members away at the moment. Often the quiet nights allow for good fellowship and a general chat. Here we all are -all 16 of us.

Check shirts were very in tonight as modelled by John,Ian and Bob.

In this Bulletin:

Pg 2 Updates and Events
Pg 3: Film Night
Pg 4: Science and Engineering day in Newcastle

Graeme and Sue Hooper attend the club. Partners Night. Please advise extras to Rotary Phone.

Events and Updates

- Last Thursday 29th a number of the club members worked at Bunnings to provide catering for their **Father's day event**. Our club is given the opportunity to be involved ahead of others and this helps to continue the strong relation with Bunnings. Donations, a voucher, and some trays of sausages came our way as well.
- The club will provide **Catering at Bunnings** on the 6th September as well.
- **Discovery Day** at Multi purpose centre Tomaree H.S. will be held Thursday 26 th of September. This is a day similar to the science and engineering days held for secondary students but at a primary school level. Students from local primary schools generally at year 6 level attend.
- Volunteers are needed early on the day to help with setting up. Otherwise help is needed in supporting the year 10 students who run the event. There is a need to know names soon to check on formalities prior to the day. Time is from about 8ish until about 2pm. If you would like to have a look without staying then this is also possible.

Please join us in honouring
our dear friend at the inaugural

Science and Engineering Day in Newcastle

These photos were provided by Phil Smith from the recent finals. Note John Stuhmcke supervising the “Power Challenge” test. Some of the challenges included the following tests. A structures that could span a metre were made from ice cream sticks and other basic items. It was tested under load until failure. Design an all terrain vehicle which could hold a load in a mechano like material. Build a tall structure which support weight and then simulate an earthquake to see how stable it was.

8 Schools were involved in the finals from regions ,Sydney,Central Coast, Armidale, Gilgandra and Keira.
