

Proposal to Adopt New Potential Members Process

With Council's approval, Club Service wish to submit the following proposal to the of the Club at a business meeting.

The proposal is to adopt a new process, as attached, to be followed when dealing with potential new members and, if suitable, progressing them through to membership of the Club

Reason for this proposal.

As a result of lessons learnt from conducting a number of 'Information Meetings' and from observations made by a number of club members regarding the lack of members involvement in club activities, we are proposing to introduce a more formal process for the management of potential Members as outlined below. By this route we are hopeful that new members will understand their commitment to Rotary and be willing to engage in the life of the club from the very start of their membership.

This proposal aim to deliver an increase in the active membership of the club.

Bryan Scurfield.
