396,000 Californians age 12–17 have depression.

High school students with depression are more than **2x more likely to drop out** than their peers.

64% of Californians age 12–17 who have depression **did not receive any care** in the last year.

7 in 10 youth in the juvenile justice system have a mental health condition.

What Does It Mean?

a **mental health disorder** each year.
