REJUVENATION PRESENTATION

With Australia's media providing readers, viewers and listeners with news of "new and better" medical interventions as well as statistics on illnesses like the flu, meningitis and cancers, it was not surprising the Club Members listened carefully when Lianne Gianoli recounted the experiences of her organization— CellF—in their quest to facilitate certain innovative cell therapy treatments when it is required.

In a nutshell, CellF claims to have the ability to harvest tissue from a patient, and to use that tissue to improve their blood cells with "Advanced Therapeutic Solutions in Complementary Medicine" - refer website: www.cellfsolutions.com

The process requires the harvesting of tissue from a suitable patient; the tissue is then cleansed before blood cells are separated from adipose tissue; the cleansed blood cells are then re-turned to the patient. This is followed by a healthy eating plan.

It was made very clear that the Therapeutic Goods Administration of Australia has an important role to play in allowing and authorizing certain proven and safe blood enhancement therapies.
