FREMONT - Morgan Beck is the Terra State Community College December 2017 Fremont Rotary Student of the Month.

A graduate of Fairfield Union High School in Lancaster, Ohio, Beck lives in Port Clinton and is a nursing major at Terra State. She plans to pursue a master's degree in nursing with certification as a Certified Nurse Midwife.

"I chose Terra State because of the positive things I had heard about the nursing program," Beck said. "It is also just a short drive from my home and very affordable when compared to other programs."

While attending Terra State, Beck has been involved in more than just her studies. She serves as president of the Student Nurse Association where she has helped organize a collection of toiletries for a local women's shelter, the roadside cleanup of Napoleon Road, a bake sale for hurricane relief in Puerto Rico, canned good drives and fundraising for student nurse scholarships.

Beck was nominated by Susan Kajfasz, professor of nursing.

"Morgan is incredibly committed to the profession of nursing," Kajfsz said. "She is dedicated to her studies and mentored other students within the nursing program. Morgan works full time to support herself and son while achieving a 3.5 grade point average."

Beck finished her classes this month and said she will look back fondly on her time at Terra State. "I have had so many wonderful experiences in my three and a half years at Terra State," she said. "I will take so much from the nursing program that has allowed me to have great experiences and opportunities."

Beck is a proud mother of one son. She likes to spend her free time with him outside camping, hiking, swimming and rock climbing.
