If you cannot carry out your allocated duty, it is your responsibility to arrange for someone else to do that duty

Yee-Hsien Wu is staying with Dr Neseem Ali and his wife Nazimah ph 021 2602520

Pres Jennifer introduced Dr Hasan Bhally who has worked at North Shore Hospital for 15 years in the field of infectious diseases. Many of his extended family are doctors. He and Pres Jennifer agreed physicians were more intelligent than specialists. Antibiotics are a magic bullet. They have saved millions of lives but need to be used carefully as they can also kill good bacteria. In 1928 Alexander Fleming left a window open near a bacteria culture and noticed that around a fungus there was no growth. After some years he tested penicillin on a policeman who showed signs of recovery but unfortunately died when the penicillin ran out. Unfortunately, microbes are clever and can change to become resistant to penicillin. In our gut we have some good bacteria and some resistant bacteria. In Europe a study was of people who had been to India and other countries close by and found on returning one third had ESSL with only a few having used antibiotics and 10% of their families were also infected. Another study compared water samples from New Delhi and Cardiff and found the New Delhi sample had significant amounts of resistant bacteria. The Solomon Islands also had resistant bacteria without having used antibiotics. Over the last few years there have been significant changes in the use of antibiotics.

From Emma. On behalf of Dominic, Rose and all the KAASO family, I just wanted to say a huge thanks for having us at your Rotary meeting last Monday evening. We thoroughly enjoyed meeting you all and felt so very welcome at your lovely club.

Dominic and Rose were thrilled to be able to finally thank you all in person and left NZ with many happy stories of their time in Kiwi land.

They made it safely back to the village and received a hero's welcome - everyone wanting to hear all about their adventures in NZ. I know they have so many wonderful memories and being able to come and talk to ECB Rotary was definitely one of them. Dominic tells me that the Rotary Club of Muyenga in Kampala, Uganda would be happy to partner with you in future if there were any further projects down the line so let's keep in touch.

Continuing the medical theme. This is a continuation of a request for swallowers I made a few years ago.

Sally Dempster's niece's daughter Marie has launched an online questionnaire as part of her PhD. It's the largest NZ study on swallowing and nutrition in adults 65yrs and older, which is why we're asking for your help. Do you know any NZrs aged 65 and over who might be willing to complete it or can ask their friends? It takes 5-10mins and they can go into the draw to win a supermarket voucher. Feel free to contact Marie if you or they have any queries m.jardine@auckland.ac.nz
