Combined meeting
Inner Wheel
6 for 6.30

Water and Sanitation
Month

27 March – Trivial Pursuit – partners welcome –\$5/\$25 – normal time-5.30 for 6pm.

Morgan’s message.

Last Monday we heard from the younger sector of our community. Aimee Dai from Rangitoto College told us about her experience at the last Rotary National Science and Technology Forum and Ishan Kokulan (past Head Boy at Pinehurst School) gave us a slide show and commentary about his experience as a member of the United Nations Youth Global Development tour. Both were excellent presentations.

During Ishan’s slide show we were introduced to the United Nations’ 17 sustainable development goals (see below and

<https://sustainabledevelopment.un.org/?menu=1300>

Areas of Focus

- Peace and conflict prevention/resolution
- Disease prevention and treatment
- Water and sanitation
- Maternal and child health
- Basic education and literacy
- Economic and community development

It is very clear to see that there is a high degree of synergy between these goals and the Rotary International 6 areas of Focus (shown opposite).

This month is “Water and Sanitation” month in the Rotary calendar, and Sean told us about progress on two water projects which the Club has been working on in Vanuatu.

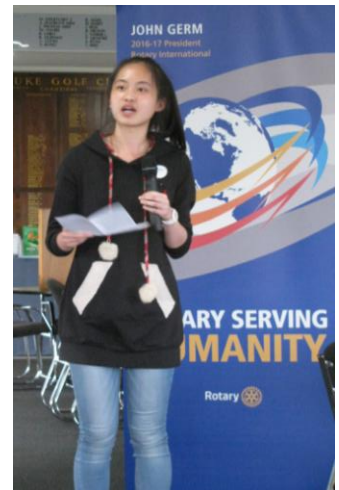

We clearly can make a difference in this club, bringing accessible safe drinking water to men, women and children in the villages of Vuniaman, Sorowa and Vuneray in Vanuatu.

President Gary

SCIENCE FORUM – Aimee Dai

Aimee is this year a Year 13 student at Rangitoto College, and during her Christmas break attended the Science Forum where the 160 students live in the Auckland University Hall of Residence and are given opportunities to explore science and technology, and socialize with others of similar academic ability. Her presentation to us was about some of the highlights of being able to attend her interests in bio-medical, chemistry, computer aided design, a visit to Fisher & Paykel, covering theory and field work, including busking, joining in group social outings, and making long-lasting friendships. Aimee gave us a demonstration of Diabolo (like a Chinese giant yoyo). She took the opportunity to thank our club for enabling her to go to the forum.

Ishan Kokulan was able to attend the Global Development Tour 2017. Ishan in the past has attended MUNA and entered UN Youth Diplomacy Competition. The Global Development Tour takes young New Zealanders to see the world through a future as it could be in 2030. His chosen subject Global Sustainable Cities and Communities.

The trip included London - visiting NZ Trade & Enterprise. Copenhagen - a green city, finding out about beef as an unsustainable food in the long term, and bugs being a food of the future for protein and harvesting, a sustainable food. Visiting Brussels - their smog problem, engineering and electric cars. Geneva - League of Nations. Paris - UNESCO. Then New York - attending the Youth Assembly at United Nations Headquarters. Is poverty and hunger a political problem? A highlight meeting Helen Clark.

Empowering young people to apply all they know into meaningful change in their communities.
