

15 July 2018

Dear fellow Rotarians

No child should die for a lack of oxygen.

Yet too many do die from otherwise treatable illnesses because of variable access to good quality oxygen in Fiji.

The Rotary Club of Remuera Inc, working in partnership with other charities and trusts, is working to raise \$650,000 in order to provide reliable oxygen supplies to Health Clinics throughout Fiji.

This is a project worthy of wide support and I fully endorse it and would like to see it come to fruition as soon as possible.

I would appreciate Rotarians giving their full support to this project when approached by fellow Rotarians.

Yours in Rotary Service

Dear fellow Rotarians

No Child should die from a lack of oxygen

Regrettably, in Fiji, over 200 children under the age of five, die each year from a lack of oxygen. This is preventable.

The Rotary Club of Remuera Inc, has therefore decided to raise NZ\$650,000 to install a reliable supply of oxygen in Health centres throughout Fiji to prevent further deaths.

This is an exciting and significant project which has my complete endorsement and I would appreciate your positive support when contacted by our Rotarian colleagues
