

OpenStrategies

(and an international library of SubStrategies?)

On-line presentation to Timaru Rotary
Tuesday 19th May 2020
Dr Phil Driver
OpenStrategies

Scope of strategies post-crisis

Large-scale, multi-stakeholder strategies

- national
- regional
- local
- multiple themes
- multiple diverse perspectives
- hundreds of stakeholders

All of the above simultaneously

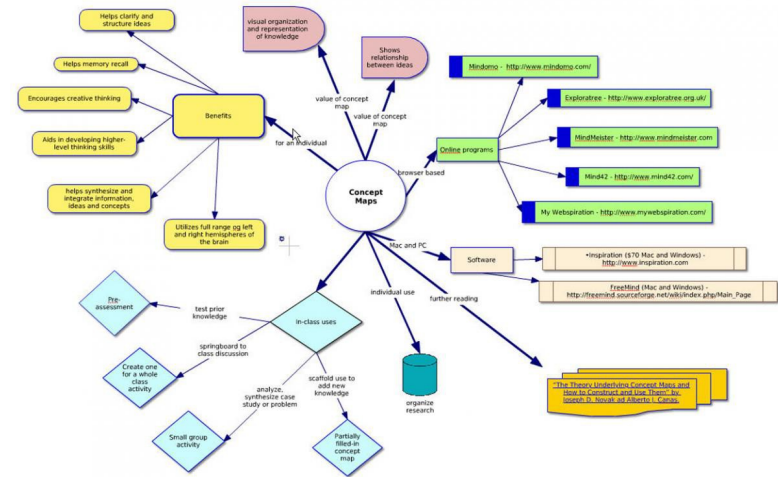

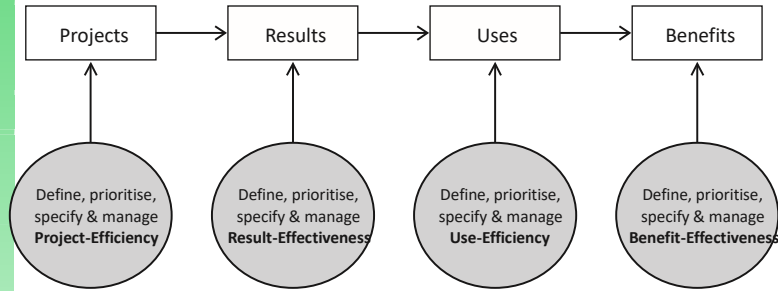

Do things with us not for/to/at us

- The post-crisis world is too complex for any individual or group to understand/manage
- Must liberate collective wisdom
- 'The powers that be' cannot be heroes and save us
- Everyone needs to save us

Human cognitive limits

- Miller's law:
 - People can hold 7 ± 2 concepts in their heads

Human cognitive limits

Driver's law: Most people can comprehend 15+/-5 concepts in a well designed diagram

Human cognitive limits

Outputs, outcomes, mission, goals, objectives, framework, vision, status, cross-cutting-themes, aspirations, strategies, plans, collaboration, cooperation, competition, values, structures, KPIs, tasks, accountabilities, responsibilities, principles, tactics, actions, directions, issues, factors, priorities, benefits, benefits-realisation, impacts, purpose, capacity, capabilities, forecasts, scenarios, drivers-for-change, data, information, knowledge, wisdom....
and sometimes 'implementation'

Human cognitive limits

*The smallest amount of strategic information
that has the highest value
to the most stakeholders**

**OpenStrategies' mantra*

OpenStrategies – a post crisis strategy framework

What should strategies do?

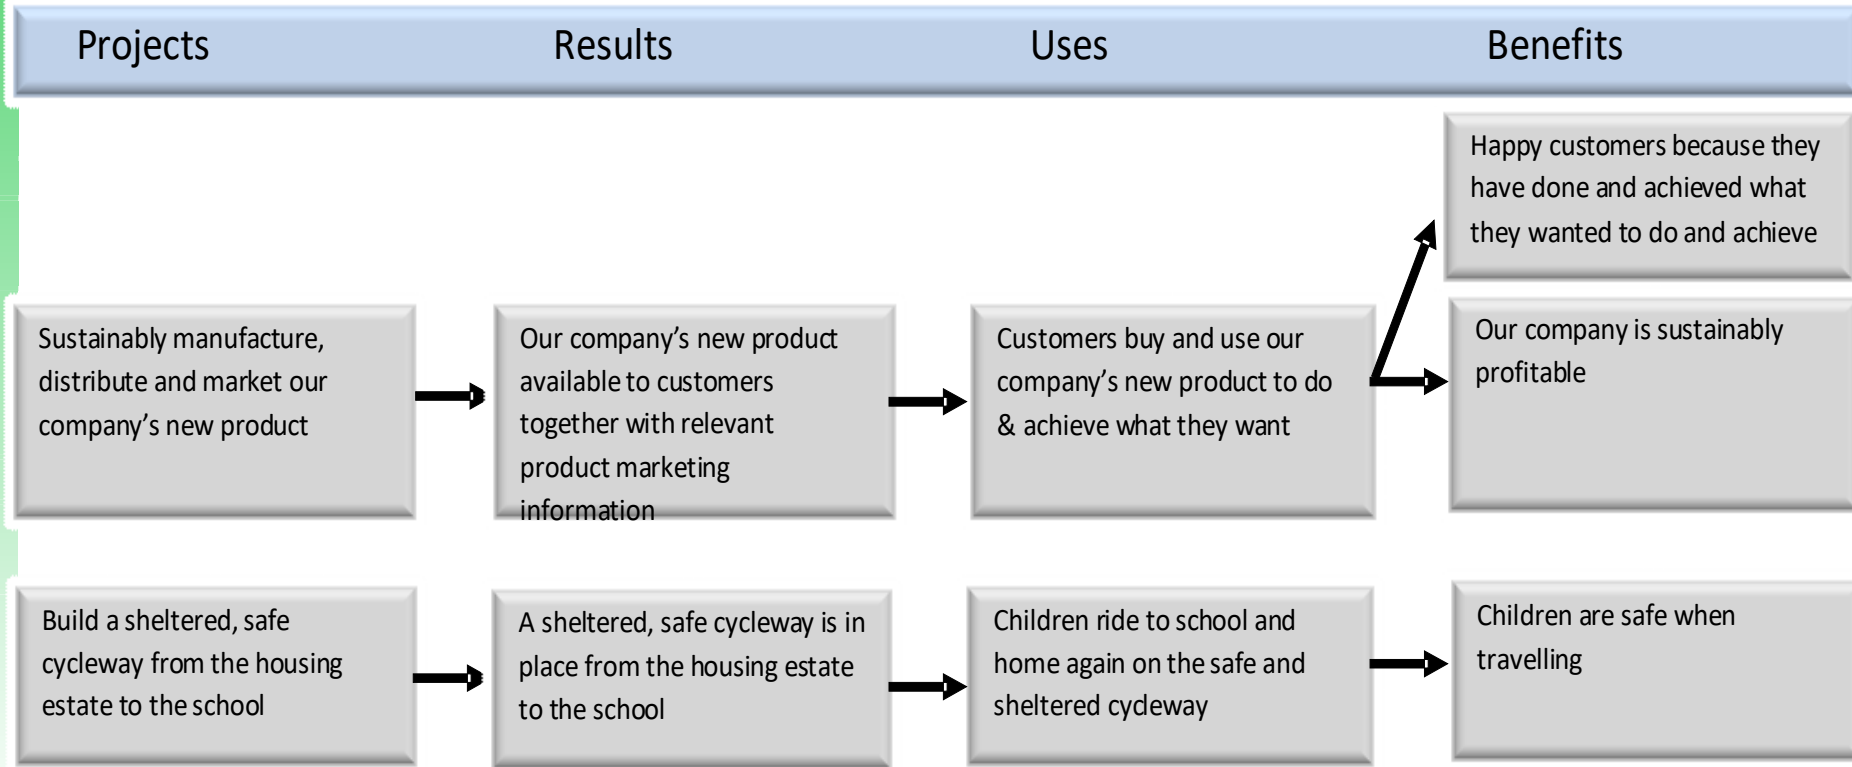

- Strategies should guide improvements in what organisations actually do and why
- So what do organisations actually do?

P R U B

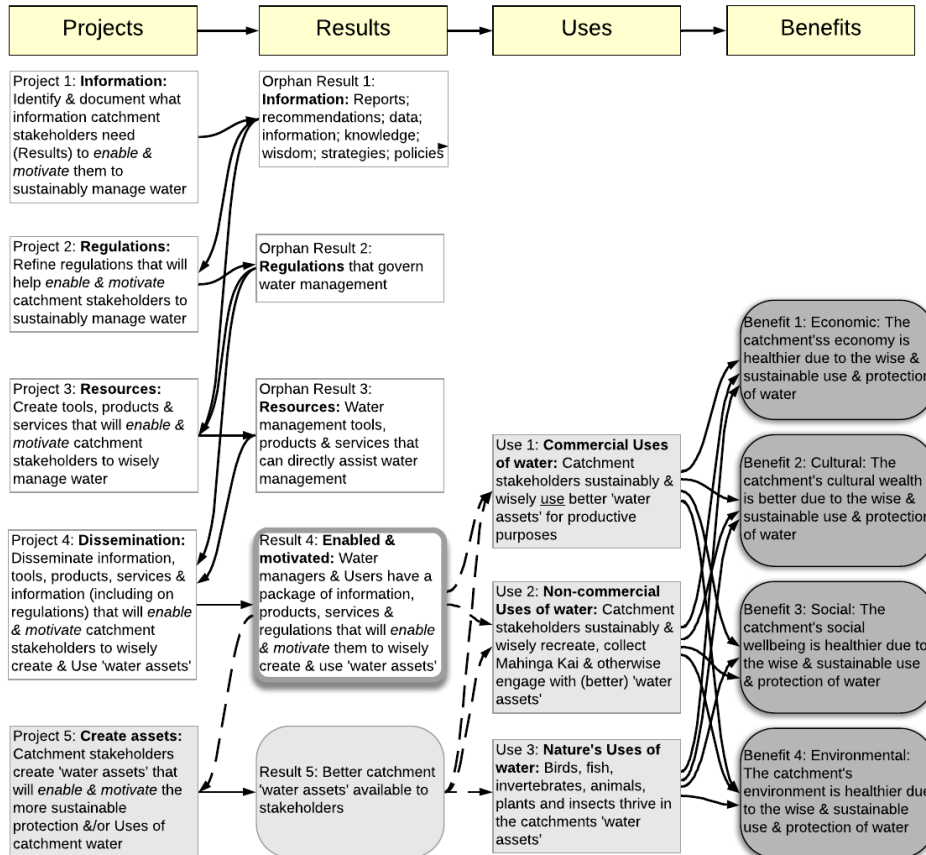

Create assets that enable & motivate people to Use assets to create Benefits

Two simple example SubStrategies

Catchment Water Management Aspirational-Level SubStrategy

Structure of a typical SubStrategy

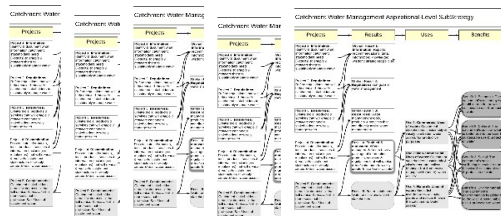

Structure of an OpenStrategy

Values	Fundamental Principles
(Human) life is sacred	We will minimise <u>net</u> loss of (human) life and suffering
Integrity	All decisions will pass 'The Front Page Test'

← 10-15 Fundamental Principles & Values

← 1 Aspirational SubStrategy
Ministers; directors; CEOs

← 5-10 Guidance SubStrategies
High/mid-level managers

← 20-100 Operational SubStrategies
Operators; individuals; community groups; businesses

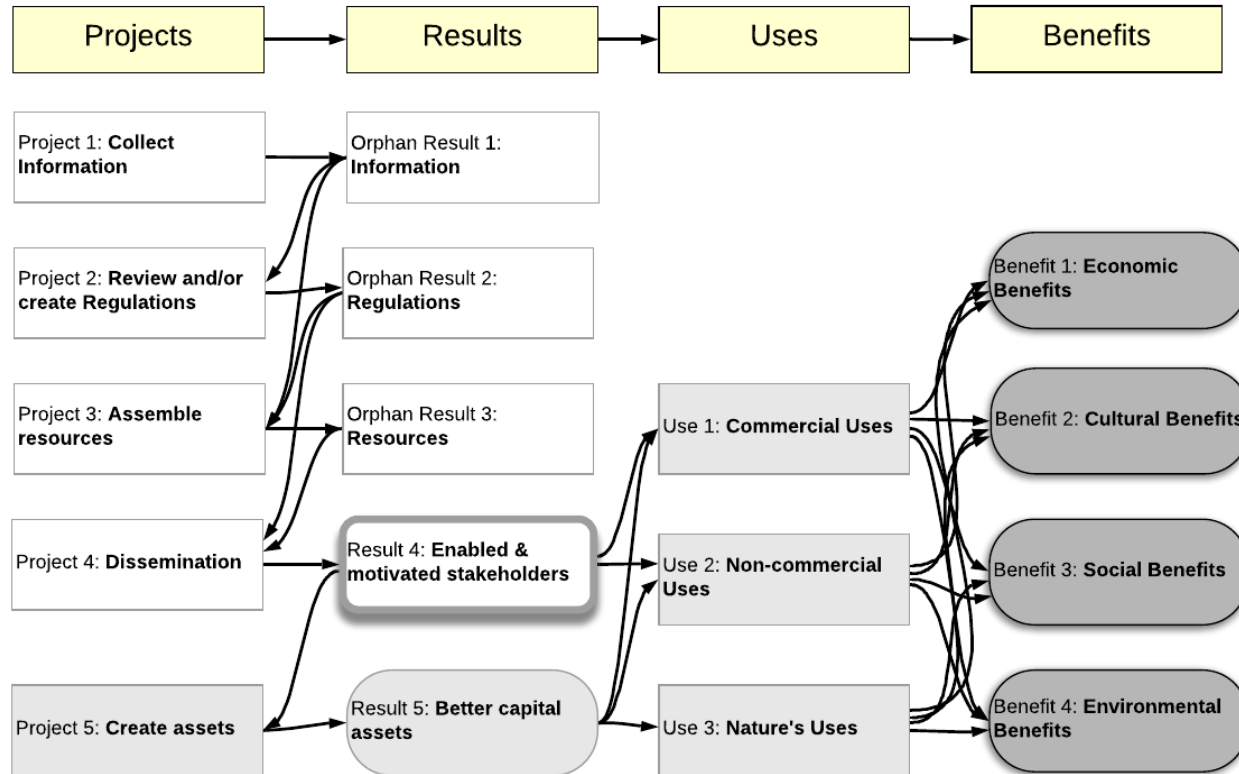

Validating Strategies

- Anyone can write a document and call it a strategy
- It is not a strategy unless it has been *Validated*
- How do we develop and Validate strategies?

Validating Strategies

1. SubStrategy Describe the idea as a SubStrategy
Is it logical?
2. Evidence Add compelling Evidence for the Links
Will it definitely work?
3. Worth Calculate Worth, which must be greater than the
cost of the Projects + the cost of the Uses
Is it worth it?

A standard SubStrategy framework?

An International Library of SubStrategies?

Covid 19 SubStrategies for:

- A nation
- A region
- Hospitals
- Care workers
- A home isolation bubble
- A sports club
- Churches
- Taxis
- A cruise ship....

Transport SubStrategies for:

- Trains
- Logging trucks
- School children
- Commuters
- The entire public sector
- The English Channel
- Food suppliers
- International travel
- Emergency services

Water management SubStrategies for:

- A region
- Catchments
- Individual farmers
- Indigenous users
- Recreational users
- A territorial authority
- A fertiliser company
- The environment

Climate change SubStrategies for:

- Regenerative farming/permaculture
- Local authorities
- Energy suppliers
- Home owners
- Travellers
- Public venue managers
- Schools
- Coastal erosion mitigation
