

I had no idea as to the extent of artificial insemination in the dairy industry. Thank goodness ethics and laws have prevented such processes from being abused & used for human reproduction. If we are incarnated after death, then please I do not wish to come back as a cow or a bull selected and milked for my semen or sent to the works for my beef if my semen is not productive enough. In a way, it is so automated it is a little abhorrent to me, but that is the reality of farming and having milk to consume and enough food for us all!

Miss a meeting miss a lot. I gain so much from listening to our fascinating guest speakers. This coming Tuesday was to be Liz Nolan and Fiona Jackson from Family Works, but they will have to be postponed due to the Covid rules, for own safety and everyone else's as well. If the Covid restrictions remain at level 2 or above, we will organise a Zoom meeting for the following Tuesday but no meeting this Tuesday. However, the Charitable Trust meeting will be by Zoom this Tuesday 24 August. Next Tuesday 31 August by Zoom if need be.

Stay home. Stay Safe!!!

Ps. If Paul Harris Fellows would like an annual luncheon with another next year, please email Stephen. If not enough are expressing a wish to have special get-togethers with PHF's from other Clubs in our area as well they will not happen!

Also, if you know Malcolm McDonald, please give him a call I am sure he would love to hear from you, to help him through the difficult time he is facing with his unwell Wife.

Kind regards to all

President Hugh
