## Eye Clinic Missions & Projects

As part of the club's outreach programs, members of the Rotary Club of Motorcycling Rotarians have supported and participated in several Rotary and VOSH eye clinic missions in various locations throughout the world.

**With your help**, we look forward to continue to provide glasses and vision services to various indigenous peoples that are less fortunate and often unable to have even the most basic of eye care and vision.

## Please Add a Cash Donation

Many do not realize used eye glasses need to be cleaned, adjusted, measured, packaged, cataloged, and shipped prior to making someone else's life for the better. Even though we are an entirely volunteer organization, and have no labor costs, we must still purchase and maintain equipment and supplies and provide for the measuring, sorting, packaging, and shipping costs of the glasses. We humbly ask for a small donation (suggested \$10/pair) to supplement our costs.

*Measuring the vision of a Kenya student*

Please send your used glasses, along with a suggested \$10/pair cash or check donation, to:

Motorcycling Rotarians Eye Project

## Donated Glasses Change Lives

In many regions of the "third world," eye glasses are a luxury item that most indigenous people simply cannot afford. The simple gift of a properly fitted pair of prescription glasses opens the doors to the opportunity for these people to better their own lives in so many ways.

Without glasses, indigenous children are often unable to attend school, let alone be able to read and learn.

Without glasses, indigenous adults with vision problems lose their jobs.

Without glasses, indigenous senior citizens become a great burden to their families and societies.

In these parts of the world, there are no aides for the vision impaired. Without glasses, life can be dangerous.

With one simple act of kindness,  
**YOU can change lives!**
