

Rotary and University of the Sunshine Coast Community Fund

Advancing tertiary education opportunities through a partnership between
the combined Rotary Clubs of the Sunshine Coast and the University of the Sunshine Coast

Annual Joint Meeting of all Sunshine Coast Rotary Clubs

Wednesday 11th May 2022

Dr Kathy Townsend's research focuses on issues such as marine conservation and human impacts on the marine environment. Kathy's research programs draw their strength from a multidisciplinary approach and focus on global scale issues, such as the impacts of marine debris and marine pollution.

Kathy actively contributes to a greater understanding of the conservation status of marine species identified by the IUCN Red List for threatened species. Kathy has provided expert advice and influenced policy development at all levels of Australian government and internationally. Kathy has been fortunate to live and work on marine research stations for over 20 years and brings a broad knowledge of tropical and semitropical ecosystems.

Kathy takes her role as a mentor to young scientists very seriously. She is consistently ranked highly by both students and peers for her teaching and community engagement techniques. As lead academic of the internationally renowned scientific programs "Project Manta" and "Turtles in Trouble", the research has been featured on multiple international documentaries, including BBC David Attenborough's Great Barrier Reef and Nat Geo Wild's "Manta Mystery".

Where? Innovation Centre, USC.

Free Car Parking (Map at www.usc.edu.au)
