Take Stock in Children

Take Stock in Children is a state-wide program that identifies economically disadvantaged 7th grade students who meet specific academic and behavioral criteria. We offer our students college scholarships, caring volunteer mentors and hope for a better life. Selected students receive a Florida Prepaid scholarship for two years at any of the 28 Florida Community Colleges, followed by two years at a State College or University. To be awarded their scholarships, students must stay in school, maintain good grades, exhibit good behavior, remain crime and drug free, and meet with their mentors. The volunteer mentors are a key component of the program, meeting with their student weekly for one hour on school grounds, during school hours. The Take Stock in Children program is the perfect example of a public-private partnership that truly works: All scholarship contributions raised locally are matched – dollar for dollar – by the Florida Prepaid College Foundation. Our students have a 95% graduation rate state-wide.
