

RCNB CATERING EQUIPMENT UPGRADE

Coffee Machine (s)

When last year's Grand Prix was cancelled at very short notice and our equipment was left on site some person (s), despite security guards, managed to steal our "Barista" standard coffee machine.

Fortunately it was insured and the Club collected \$3000 from insurance and \$1000 embarrassment contribution from the Grand Prix Corporation.

After extensive research at many locations and numerous cups of coffee we have purchased an excellent Swiss Automatic Coffee Machine produced by Jura. (model 15268)

The machine weighs only 18 kg, has inbuilt coffee grinder, touch screen for all functions including 10 types of coffee preparation, connected milk chiller attachment, 10 amp generator compatible, etc, etc, etc, etc, ----- .

No operator training required !!!!!

With proven experience with this machine there is sufficient funding for a second identical unit to be purchased. That would take capacity to four cups per minute.
