

### Club Meeting 19 September

Last week we enjoyed the hospitality of Eva-Tilley house staff and CEO Sharelle Rowe.

Those present enjoyed a lovely meal and presentation by Sharelle and were enlightened of aspects of aged care and impressed by the new 4 million dollar refurbishment of the facility.

Sharelle thanked our Gardening Program students for the great assistance given in rejuvenating the grounds and making the surrounds more enjoyable for clients.

Visit <https://www.evatilley.com.au/> and you will also see a couple of excellent photo models on their website home page!

**Next Meeting is Thursday 26<sup>th</sup> and it's our traditional AFL Grand Final Partner's Night**

Now we know the finalists are Great Western Sydney Giants and Richmond Tigers.

Our Guest Speaker is, Ray Wilson AOM. Ray is a past Hawthorn player who has a bio of "Solid, quick and extremely difficult to beat, Hawthorn's recruit from University Blacks, Ray Wilson, had an immediate impact on the league football scene when he made his debut in 1966. Playing mainly on the wing he enjoyed a stellar season, landing the Hawks' best and fairest award, and suggesting quite strongly that he was a rare champion in the making.

It's a Partner's Nights so please bring partners or a guest to hear from this most entertaining guest speaker and enjoy this colourful night which you will make more colourful by wearing your favourite team's colours!

Have a great week in Rotary President Pete

### Geoff's Health Tip

Recently there has been a great deal of media coverage on the alledged carcinogen glyphosate, the active herbicide in Roundup. Roundup has been linked to cancers, diabetes, Alzheimer's, Parkinson's, liver disease, kidney disease, birth defects and more. On top of that, many believe it's what's been [killing off the world's bees](#), vital participants in the human food chain.

A survey of commercial American beers found levels as high as 49 parts per billion (ppb) with an average of 20 ppb. On the other hand, several organic beers had an average of 3.5ppb, and in one organic beer the carcinogen was undetectable. I would think we would find similar results in Australia.

Does US wine contain glyphosate? Yes it does, and in the same amount as commercial beer, but again the organic wines were of the same order as organic beer. Don't ask me whether there is any in whisky!

Everyday we read and hear about people who have these diseases and yet while it is most distressing to the person and family concerned, the rest of the population do not seem to care.

In my view we should all consider moving to certified organic products in place of the commercial varieties. I say this because Roundup is not the only car-

cinogen in food. There are others which have since been removed from the food chain as the regulators gather information on their effect on public health over many years.

According to new research, published in the *Australian Organic Market Report 2018*, as many as eight million Australian households buy organic grocery products every year, but the higher price tag that goes with going organic is keeping many more from getting involved. This may change as people get more concerned about their health and farmers respond to the increased demand for organic foods.

As Professor Marc Cohen from RMIT University said *"I suspect eating less poison is good for you"*.

## **Boroondara Chances Golf Day on 28/10/2019**

1. Sponsor a hole in the name of your business from \$300.00;
2. Book yourself or a group of 1 to 4 players into the golf day – see below
3. Make a donation via Boroondara Cares Foundation on their website, [www.boroondaracares.org.au](http://www.boroondaracares.org.au)
