## Labelling the playground for extraction

- Each playset in a playground has its own letter
- The letters are unique so the playsets can be sorted at DIK
- The numbered plans have a number for every piece of the playground
- Mark the number in the middle of each piece as **large as possible in permanent ink** (eg C1, C25, C13)
- At each joint mark with the joint label in permanent marker
- A joint label is made up of the two numbers of the pieces that join – lowest number is always first. Drop the letter. (eg 1-25, 13-25).
- Each side of the joint is marked with the same label
- whilst a component part might look identical to another the reality is that the holes do not exactly match as they were drilled onsite. To interchange pieces that appear identical might require holes being slightly re-drilled when being reassembled in Sri Lanka rendering the structure less stable. ***The codes are important.***

- You will get access to a labelled set of drawings with photos of your playground for your team to label each piece.
- The piece labels are shown on the photos. If there are any missing just write them on the drawing please.
- The drawings include a table describing each piece
- For the work on site you need A3 single sided colour copies of the drawings with you and at least two people to do the marking.
- The joint labels need to be added to the equipment so it can be reassembled.
- Joint numbers are written as two numbers lowest-highest, eg 3-6 on the joint between pieces C3 and C6. Each side of the joint has the same label marked in permanent marker. If there are two joint points ie two screws they are labelled 3-6a. and 3-6b, again repeated on the C3 piece and the C6 piece.
- See the example on the end page

- The whole point of this drawing and labelling is to provide plans for the other end to reassemble the playsets.
- You have marked up the drawings with any piece numbers that were wrong or missing.
- Now I need them back to make any changes then post them for the other end to use.
- You can photograph the changed sheets then email me the photos or snail mail me the markups. (I'd prefer an email to [borlyn@tpg.com.au](mailto:borlyn@tpg.com.au) thanks)
