

The playground equipment was in a container Sr Hermina organized and sent in May 2019 to a sister school in Buturu, in Tanzania, near the shores of Lake Victoria.

As well as seeing the kids enjoying it, I am so pleased that the equipment is being used and not wasted. There would have been an effort for the nuns to erect it.

So you can feel comfortable that the other items in the container were appreciated and used as they should be.

This would have been the ninth container the Sisters of the Resurrection in Essendon have sent to the same area.

Just some smiling faces to show how all your efforts are worthwhile and much appreciated. These are photos from Sr Dominika CR in Buturu to show how the playgrounds sets look after installation
