Kym's Catch Up

It's grants season and High-Risers have been busy applying for District support for our projects.

We are very happy our application to fund a boxing program for Albert Park Flexible Learning Centre students has been successful 😊. The program will help 6 young people deal positively with the issues affecting their lives, through a sense of control and respect instilled in the boxing sessions.

We have also agreed to help the Rotary Club of Nondugl in PNG to finish building 'Rotary House'. President Andrias realised the availability of accommodation in other areas such as Mt Hagen often led to more economic activity. Andrias designed Rotary House himself so that it would include a number of bedrooms and also a meeting room where the club members could gather for meetings on any village related matters.

We are providing ply wood, nails and paints for the project at a cost of AUD\$1834, half of which is covered by a District grant.

Its wonderful to be able to make such a positive contribution to communities in our District.

President Kym

Rotary we
Give our sincere thanks*

LAST WEEK'S MEETING

Last week we enjoyed great fellowship and President Kym walked us through our new look Brisbane High Rise web site that was built using Club Runner. It looks fantastic and Kym has done a great job. It is easy to update, allowing a number of members to input content. So say good bye to our old site (pictured left) as it will soon be replaced.

FELLOWSHIP NIGHT- INDIAN FEAST

Friday 14th June
6.30 pm

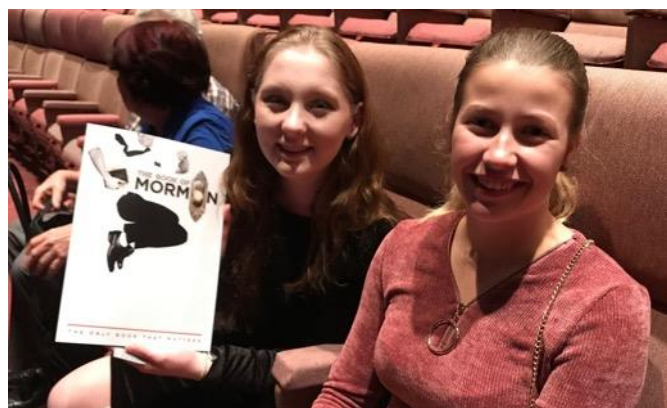

Halim Taj Restaurant
1/155 Baroona Rd
Rosalie / Milton

VASCOLYNNA UPDATE

Hi Dr Arvier,

I saw Vasco at her review last week. She has recovered well from surgery but, a bit of a problem in bringing the teeth together. Lip competency is good. I advised her on continuous jaw exercises. She has greatly improved her oral hygiene and weight gain. Now I am also sending you the pictures of Chaseley. I'm still trying to contact Archy Paul, I will keep you posted.

Thank you.
Takovi

Awesome
effort

Barb's Joke Corner

When NASA first began sending astronauts into space, they were confronted by a small problem. Their standard ballpoint pens would not work in space. They spent a decade and twelve million dollars designing a pen that would work below three hundred degrees, in space, and on glass. Russia used a pencil.
