Rotary Showcase is an online application that allows Rotarians and Rotaractors to share stories of their clubs' successful projects with people around the world. In addition, project stories are a source for features in Rotary International blogs and newsletters.

The Showcase's Impact Tracker shows the impact of each Rotary project in terms of volunteers and volunteer hours, cash contributions, and in-kind donations. It also shows the collective impact of all reported projects.

Success stories posted on Showcase can serve as an inspiration and a model for other Rotary and Rotaractor clubs.

#### **IMPACT TRACKER**

In the Impact Tracker, add the total number of volunteer hours and volunteers, cash contributions, and in-kind donations for the project. Totals are calculated for the project, and each project's impact data become part of the aggregate presented on the Rotary Showcase landing page, showing the cumulative global impact of Rotary and Rotaract projects around the world. For projects that span multiple years, clubs can add impact data for each Rotary year. When club presidents update their clubs' accomplishments, they can import Showcase impact data into Rotary Club Central. Once imported, data will be synchronized between Rotary Showcase and Rotary Club Central.
