February 2018

New Rotary Employment Partnership Video

The Rotary Employment Partnership is thrilled to share our new video highlighting three employers who speak to the importance and power of the Rotary Employment Partnership! The video features employers across the Province in Districts 5360 and 5370.

As the video is only six minutes long it is perfect to share at Rotary meetings, Rotary board meetings and meetings with potential employers!

See what's possible when a door is opened to an individual with a developmental disability. The benefits to the employer are undeniable!

Take the time to watch the video today by clicking the link – SHARE it with your club members and people in your network! Enjoy!

Celebrating New Jobs... Thanks to Fish Creek Nissan, Plastic Works Inc. & Rotarians like you!

Thanks to Rotarian Darryl Luhr (left) for making the connection to Ken Brown, General Manager (right) who hired Steven (middle) to assist the team at Fish Creek Nissan!

Thanks to the hard work of Rotarians Darryl Luhr from the Heritage Park Club and Hans Tiedemann from Calgary South, the partnership secured two new jobs in December! Steven enjoys his job at Fish Creek Nissan where he ensures customers have a good car shopping experience by keeping the cars and the dealership spick and span. General Manager, Ken Brown commented, "we all appreciate the work that Steven does here at the dealership". If you are shopping for a new vehicle make sure you check out Fish Creek Nissan and support an employer committed to hiring people with disabilities.

Cody is learning many new things under the strong mentorship of John McBean, owner of Plastic Works Inc. and a master in all things plastic! Thanks for making the connection Hans.

Congratulations Steven and Cody!

Meet Two of your Jobseekers...

Simoun A. is a bilingual graduate of Bow Valley College where he studied computers and English, and the University of Calgary Inclusive Post-Secondary program where he studied psychology, archeology and computer science. Simoun is extremely professional and his strong communication and computer skills, especially with the Microsoft Suite, Windows and Outlook, would make him a valuable team player in any company. Simoun would love to find work as an administrative professional where he could build a long-term career. He is available for full-time opportunities and since he possesses a valid driver's license, he is open to opportunities throughout the city.

Martin B is a personable and reliable job seeker who is seeking a part-time position where he can leverage his geo mapping and data entry skills. Martin is committed to making a meaningful contribution to the workplace and he would excel in the non-profit sector where he can combine his skills and talents with his interest in helping people.

Congratulations on your job at Plastic Works Cody (left) with owner John McBean (right)

If you have connections to potential employers, please contact us to start a conversation about hiring someone with a developmental disability!
