November/December 2010

District Governor 6380
Janet McPeek
and husband Phil McPeek

Greetings from the District Governor

As you are reading this newsletter, we are at the midpoint of our Rotary year and at the beginning of a new calendar year.

In so many ways, the stories in this newsletter underscore the strengths of District 6380. No one can deny the impact of the economic challenges in Southeast Michigan and in Chatham Kent. Yet that has not held us back. Every single Rotary club in the district has gone forward with projects and speakers and events and involvement in local and international service.

You all found creative and meaningful ways in November to celebrate Rotary's heritage of Vocational Service. Throughout the month of December there have been numerous ways that Rotarians have focused on family, both by holding traditional holiday parties at the club level and by reaching out to help families in communities near and far.

The time that I spent in Ghana was powerful in so many ways. You will see the amazing video that Mary Sloan has put together. Jeff Lichty gathered a great deal of information and was instrumental in the networking that enabled us to visit some places that we would not have otherwise seen.

Since our return, I have received numerous emails from Rotarians I met while in Ghana asking first if we were home safely and then how we can keep the dialogue going. I even got a phone call at 3:45 a.m. shortly after we returned from a Rotarian from a club in Accra who wasn't aware of the time change. He of course apologized about the time, but I was thrilled as he had a wonderful idea about how we could work together. He also was still amazed to learn that we have some of the same needs in our communities in Canada and the United States as our jobless rates have led to increased use of food banks and the other issues we face.

We are so fortunate to be part of a Rotary family. We care about the members in our clubs and their families, we care about the larger Rotary family that is our District 6380 and we care about Rotarians around the world. We all have stories to tell as we do what we can to help. Thank you for sharing your stories as it is how we all can feel a part of this collective effort that is Rotary.

Phil and I wish you and your families all the best as you spend time together and welcome in 2011. I am so proud to be a part of a group of Rotarians who wouldn't think of being anything but Bigger, Better and Bolder.

Happy Holidays and a very Happy New Year!

What's Going on in District 6380?

Richmond Rotary donated
15,000 books to the Gift
of Reading, sponsored by
The Free Press

Rotary Club of Ann Arbor North
participated in the
Annual Kiwanis-Rotary
Holiday Sing on December 5th, in
order to entertain area children
and engage the Holiday spirit

Oxford Rotary served
Christmas lunch to over 150
seniors on December 14th,
followed by a visit from
Santa and Mrs. Claus,
who presented gifts to each
senior in attendance

Brighton Rotary Club is
hosting their 2nd Annual
Blood Drive on
December 20th

Warren Rotary Club is assisting
Carlson Elementary School with their
handicapped children's Christmas
Party on December 14th

Ginger Barrons, from the Rotary Club
of Farmington, hosted an impromptu
fundraiser with other Rotarians when
she was in Boston; this group of
Rotarians who had never met each
other raised about \$200!

Novi Interact conducted a Purple
Pinkie Day and raised \$226 for
World Polio Day

Holiday Cheer from Your District Polio Chairs

The holiday season is a perfect time to reflect on our accomplishments in the area of polio eradication. In 1988, when Rotarians began working toward a polio-free world, 1,000 children were paralyzed from the polio virus every day! Since then US \$8 billion has been spent toward fighting polio and 2.5 billion children have been immunized. In 2009, there were 1,483 cases of polio. Thanks to our efforts, the number continues to decline with 841 cases for 2010. The new bivalent vaccine has proven to be a valuable tool in helping us win the war on polio. India has gone from one of the highest transmission areas to zero reported cases in the past few weeks. It is easy to see we are getting close to eradicating polio! As we celebrate all that we have done, please remember we still have a bit more work ahead before the grand celebration! We need your help. Please contact PDG Keith Koke or myself for any assistance you need to help reach our Rotary International goal of \$2,000 per club. Theme logo T-shirts are available at a cost of \$10 each to use at your club fundraiser. Contact Ginger Barrons for more details. Together, we can "End Polio Now."

Happy Holidays & Best Wishes for the New Year!

Ginger Barrons, Polio Plus co-chair

Making an Investment with a Superior Rate of Return

■ **PDG Jeff Lichty**

Giving to the Rotary Foundation is an investment. The return is a child who gets a book because of a matching grant, a college student who gets to study and personally know a new culture with an ambassadorial scholarship, a midwife that gains new knowledge to save mothers and children. It's about a return that results in giving the very basic necessity of life – clean water -- to someone you will never meet. It's a return that makes sure your community library has the books it needs, or the playground that is safe and fun for the children the play in. If we want the return, we need to make the investment. Please, continue to give to The Rotary Foundation.

Send TRF Contributions to:

United States: The Rotary Foundation

14280 Collections Center Drive Chicago, IL 60693

Canada: The Rotary Foundation (Canada) - Box B9322

P.O. Box 1900, Postal Station F Toronto, ON M4Y 3A5

For more information on the Foundation or to make arrangements for a club presentation, please call me at **248-625-4244**.

Larry Courson
with Sisal panels

Foundation Fund Development Chair ~ The Step Beyond ShelterBox . . . SISAL HOUSE

The Rotary Club of Dexter and the Dexter High School Interactors are undertaking an exciting new housing technology program. Sisal House provides structurally sound, environmentally friendly, easy to manufacture, and easy to assemble, housing units and components for use as temporary or permanent housing in developing countries and/or in response to housing crises caused by natural disasters. Sisal House products are manufactured from sustainable, indigenous fiber crops that are easily grown and harvested with minimal energy cost, and are carbon-consuming. Sisal House products will be manufactured on location using low technology. The technologies are as simple as manual presses and locally produced resin products. Sisal House technology has been tested, and is now ready to be prototyped and further developed for widespread adoption.

Sisal House complements the Rotary International ShelterBox Program and provides the logical extension of providing low cost, locally produced, interim and/or permanent housing for both disaster recovery events and for developing economies. Analogous to ShelterBox, Sisal House will be delivered as a "Sisal House Factory Box," ready for implementation by indigenous personnel.

The Sisal House project is a planned multi-phase, multi-year project managed through the Rotary Club of Dexter Foundation. The first phase of the project will be a prototype playhouse made from Sisal panels, designed and executed by the Dexter High School Interact Club with oversight provided by Rotary Club of Dexter members with appropriate technical skills and international development experience. As the project progresses, alliances with other domestic Interact clubs, other domestic Rotary clubs, and appropriate international clubs will be developed.

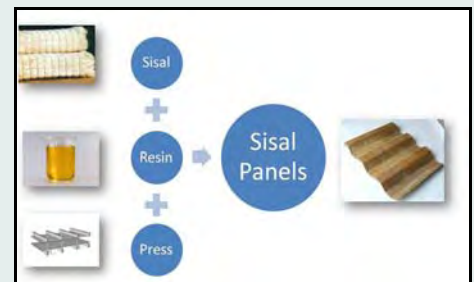

The project was conceived by Juan Ramos, a member of past president Larry Courson's congregation. More about Sisal House can be found at <http://sisalhouse.incipi.com>

For further information, contact:

Larry Courson larrycourson@peaceaa.net or Steve Feinman sfeinman@mindspring.com

Sisal House - Factory in Box

- Contains
 - Press(es)
 - Resin/Catalyst
 - Pre-formed Sisal Fiber Mats
 - Optional House/Shelter plans
 - Hardware
 - Paint Brushes
 - Basic Hand Tools
 - Plastic sheeting
- Potential Upgrades
 - Self-powered Air Compressor
 - Pneumatic Press
 - Pneumatic Resin Sprayer

District 6380 Water Activities and Programs (2010-2011)

Our Way to Celebrate Our Great Lakes Water Heritage!

■ submitted by Marc Forest

Let's raise our glass of water in this season time of joy and happiness to celebrate the fact that 20 percent of the world's fresh water has been entrusted to our care for being close to us and our immediate neighbors!

Let's treasure this responsibility by being good citizens in our use of this unique resource, needed for human life. Let's not be indifferent to it because it happens to be within our state borders or close reach.

Outside of our country, this often is not the case. 1.6 billion people out of more than six billion do not have access to clean water, and 2.6 billion do not have sanitation facilities. What can be done about it? District 6380 is doing something about it, within RI and in concordance with WASRAG programs.

This is one of our challenges which we answer by providing locally made and ready-for-installation BioSand filters to households and rural schools to raise health conditions, allow kids to attend school on a regular basis, use most, if not all, closely available water, and reduce the need for long trips to polluted streams.

● See Joyce Joyce's report on **Bonao** next page.

● **Nepal:** Eileen Heasley and husband John travel at least once a year to Nepal to support the implementation of ceramic filters made locally. Their fundraising is also supported by the Detroit Area Rotaract Club. The Heasleys concurrently provide support to sanitation projects in Nepal. Contact Eileen Heasley at ehasley@wideopenwest.com

● **BioSand filter Workshop:** Troy Rotary, working with A Vision for Clean Water, has tentatively scheduled the **BioSand Filter Workshop from April 15 to 18 at Colombiere Center in Clarkston**. The timing overlaps a weekend to better accommodate those who work. We will be conducting some evening sessions and ask all participants to plan on staying overnight at the Colombiere Center during the workshop. The cost for the workshop is \$500 is for the workshop and \$220 for four nights at Colombiere including all meals. This workshop will offer instruction and hands-on experience in the construction of all filter components, as well as many more topics regarding water issues and their impact upon developing countries. We expect the workshop to fill, so please indicate your interest as soon as possible. For more information contact Eileen Heasley, ehasley@wideopenwest.com

● **Ecuador - Santo Domingo de los Colorados:** The Pontiac Rotary Club has sponsored a BioSand filter project to produce and install 170 filters in households and schools. The project is nearing completion. Health improvement results are positive, as monitored and being reported by a local M.D. and a support team trained by the Cousineaus. A new project for 150 additional filters has been prepared and submitted for funding to the District Grant Committee under the Rotary Foundation District Grant Program. Contact Jamey Kozierowski at jameyk@hutzenlochergruop.com or Ron Cousineau at rjcousineau@aol.com
Ecuador - Rotary Clubs of Tomebamba Cuenca, Gualaceo, Esmeraldas and Zaruma.

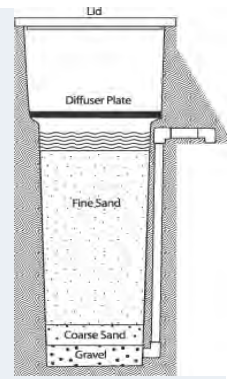

● The Rotary Clubs of Milan, Novi and Chatham Sunrise are working with the Ecuadorian clubs to implement a BioSand filter program including training, manufacturing, installation and production under a concept encouraging the development of local manufacturing and sales to the public at large. Program Proposal per Rotary Foundation Global Grant has been circulated to the district leadership and participating clubs in District 6380 and 4400. Contact Gary Sobotta at gsobotta@finlan.com

● At the **October 2010 BioSand Workshop**, Gary and a member of his family have been trained by the Heasleys and CAWST. Gary will lead the Ecuador Global Grant implementation.

● **BioSand Filter - Communication Development**

Rotary-sponsored projects are requiring a greater degree of sustainability. Technically, products such as BioSand filters have achieved a high degree of sustainability; their life is extended through their durable construction -- concrete shell, the use of media impervious to organic decay, calibrated and washed sands, easy and simple maintenance. Experience shows that, despite the training and support given to the users, the filters are not always used as intended. The root cause is mostly due to the trainer's inability to ensure a good and long-lasting understanding of the system. In other words, communication must be able to reach the user. Within District 6380, the need for better communication with the poorest of the poor is now the object of evaluation and remedy through the development of pictorial means of communication. On November 23, former Ambassadorial Scholar and a water management specialist Erica Gwynn presented to the Birmingham Rotary Club her experience in organizing effective communication during her work in Mexico, and the first sketches developed to reach users of BioSand filters. This work is inspired by the results of Linda Eastman (Rochester club) during the implementation of her midwife program in Guatemala.

Erica is currently leading the development of pictorial aids by talents recruited within Interact clubs in the district. Her initiative is giving new meaning to the contributions by Interactors to the sustainability of projects. Still in its infancy, Erica's work is called to become a key support in successful project implementation. Interested in participating, please contact Erica at: erica.gwynn@gmail.com Erica's work is the beneficiary of a small stipend from the Bloomfield Hills Rotary Club.

Eileen Heasley, BioSand implementer and trainer, Gary Sobotta, leader of the Ecuador Global Grant initiative and Marc Forest are next to Erica at the conclusion of her presentation.

Celebrating Our Foundation

The Rotary Foundation (TRF) has been a tremendous help to our Sterling Heights Rotary Club by providing a District Simplified Grant and three matching grants for BioSand water filters for very poor areas near Bonao, Dominican Republic. With the help of the Bonao Rotary and fundraising by the Sterling Heights Rotary, these TRF grants have provided about 1,100 BioSand filters producing clean water to about 13,000 people. This means fewer water-borne diseases (diarrheal and other diseases) and healthier people who are better able to work and attend school. It also means that people do not need to spend their very limited financial resources on medicines, doctors or bottled water -- all of which decrease funds available for nutritious food, school uniforms, transportation to work, etc. John and Joyce Joyce, who have led these projects, have recently applied for a Rotary Foundation District Grant in hopes of continuing BioSand projects in the Dominican Republic, perhaps even more essential now that neighboring Haiti has a cholera epidemic.

A school in Ghana

Helping Babies Breathe

■ *Linda Eastman ~ Rotary Club of Rochester*

I had the great honor to attend the first-ever Helping Babies Breathe Mentor Training in Washington, D.C. on December 2-3. Helping Babies Breathe (HBB) is a joint initiative of the World Health Organization and the American Academy of Pediatrics. In 2000, the UN Summit on Millennium Development Goals concluded with the adoption of a global action plan to achieve the eight anti-poverty goals by their 2015 target date and the announcement of major new commitments for women's and children's health and other initiatives against poverty, hunger and disease. HBB was developed in response to Millennium Development Goal #4: Reduce Child Mortality Rate.

Rotary clubs throughout District 6380 and beyond have supported Midwife Training Workshops that my husband, Jay (pediatrician and Rotarian), and I have given in a very remote region in NW Guatemala. Helping Babies Breathe will be integrated into all subsequent training. We feel that it will make a major impact on the extremely high infant mortality rate of the region. Plans are already underway for the next training, which will be part of District 6380's Future Vision Global Grant, if approved.

In addition to learning very valuable skills to resuscitate infants who are born not breathing on their own, HBB afforded me the opportunity to network with others who also work in Guatemala. My friend, Karen Moore (neonatal nurse practitioner) and I were able to make some invaluable connections, and we've already started to do some joint planning on how to make a bigger impact throughout the country. A representative from the Guatemalan Ministry of Health was in attendance at the conference, and I was able to talk to her about rolling out the program to all 30,000 Traditional Birth Attendants throughout Guatemala. Yes, it sounds ambitious, but it can be done by having a strong vision and working together with others who share the vision and understand the scope of the problem. If I were younger and in better shape, I would be doing cartwheels up and down my driveway today. This was a huge opportunity for us and for Rotary!

Lake Orion Sunrise Rotary

■ **Peggy Bartz**

When real life experience collides with a Rotary club that is looking for a major project, things HAPPEN!

Everyone knows the story of the three bears, and of who was sleeping in whose bed. Goldilocks had no bed, but had to use someone else's. But for some local children, there was no bed in the house for Goldilocks to even find. Lake Orion Sunrise Rotary, through the connection they had with a LOVE INC startup group in Lake Orion (Love in the Name of Christ) discovered that there were children in the immediate area sleeping on floors or couches. The local St. Vincent De Paul people confirmed these findings too. Even the local Oakland County Furniture Bank could not keep up with the demand for beds for kids; the waiting list was about eight months.

Enter the Lake Orion Sunrise Rotary Club, who through various connections with several members, connected the dots and made things happen right in the local community of Lake Orion/Oxford. The **Beds for Kids project** is now well on its way, and even with a few minor bumps on the road, they have now donated more than 50 beds to children who would otherwise be on the floor. A Big Lots Store in Flint with a manager with a big heart keeps us supplied with the actual beds, which are paid for by the donations. The Lake Orion Rotary Duathlon that is held annually in Lake Orion is the main arm of funding.

This year, the club decided to take the project a step further, and as you see, they participated in the Lake Orion Annual Lighted Parade, the largest lighted parade in Michigan. The building of the float was just as much fun as being in the parade, as all the members had a part in construction and putting together the float. The theme was Wonderland this year, and the club was very proud to have this float in the 60-plus float parade. The children had a blast playing together, and the giant bed was also an opportunity to explain to them that not all children have a "Warm and Cozy Place to Be" every night as they go to bed.

Lake Orion Sunrise Rotary meets every Thursday at CJ's in downtown lake Orion at 7:15 a.m. visit them at www.lakeorionrotary.org or on Facebook.

Rotary Jeopardy

■ **Shelley Lake**

For the past four years, several Rotary clubs have played Rotary Jeopardy during Foundation Month, November. Questions each year come from the August, September and October issues of the *Rotarian* Magazine.

Past district governor Mike Rambus created the concept with a friend who had access to a light/buzzer system. The games began in Berkley, traveled to Birmingham, then to Royal Oak and then to this year's venue, Bloomfield Hills.

Bloomfield Hills Rotary contestants, Bob Hoisington, current president and past district governor George Moore III were the winners in 2009, and their club hosted the match at their meeting on November 9. Bob Hoisington threw down the gauntlet proclaiming "George has forgotten more about Rotary than anyone in the world knows."

Charles Wickins and Wendee Rex represented the Birmingham club, while Cheryl Murray, president-elect and past district governor Don Chisholm represented the Royal Oak club. The Berkley Rotary Club was represented by past district governor Mike Rambus and Celia Morse, who scored a come-from-behind-victory in Final Jeopardy as more than 70 Rotarians hummed the theme from the popular game show.

Keeping the warring factions in line were moderator, Royal Oak Rotarian Shelley Lake and scorekeepers Tim Keenan, president Royal Oak Rotary and Christine Tvaroha, past president of Bloomfield Hills.

The winning club, Berkley Rotary, took a Paul Harris Fellowship, the highest honor of RI to award as they choose.

Next year's game will be held at the Birmingham Rotary Club and the hope is to add more clubs to the mix.

Clarkston Rotary Club

■ *Mary Sloan*

The first and second weekends in December make up a favorite time for the Clarkston Rotarians. On the first weekend, club members are joined by friends of Rotary to sell the Clarkston Rotary Goodfellows Edition newspaper on street corners in Clarkston. The paper is written by Clarkston Rotarians and contains Rotary news, both local and international, from the previous year. The next week, all the proceeds from the paper sale are spent on shoes, boots, hats and mittens for needy children in the Clarkston area, and on the second weekend all the goods are distributed. The schools and Clarkston Lighthouse help select eligible children. Last year, 651 children were signed up for the program. More than 2,000 volunteer hours are needed for the two-weekend program. It's a great fellowship experience for Rotarians and non-Rotarians alike, and it's one we all look forward to and prepare for all year.

Birmingham Rotary Club

■ *Susan Earp*

A very energetic team of Birmingham Rotarians recently met with representatives of Davison Elementary School in Detroit. In addition to delivering a dictionary for each third- and fifth-grade student, the team proposed the development and implementation of a financial literacy training program for Davison students. The training would be provided by Birmingham Rotarians and allow us to share our knowledge and expertise with the children who work in the Davison Micro-Society (the Davison Micro-Society is a mini community within the school that presents real work experience among students).

The training will initially be focused and delivered to the group of students who are included in the Managerial/Entrepreneurial Micro Society training. That group of students meets on Tuesdays and Wednesdays. We believe that we could plan a program that would present a financial literacy program possibly once per month the last hour of the school day (1:30-2:30 p.m.) to groups of five or six students over the course of a few months.

In addition, the team discussed the potential of providing financial literacy training to the faculty and parents. The school will communicate this opportunity with its LSCO group (PTA).

Next steps include the identification of a schedule of Micro-Society training dates, and also identification of the LSCO meetings. Members of the team have a great deal of training information available that we can customize for our programs.

We look forward to growing this program and working with our membership to ensure success. Once we're established, I'm sure our Rotary community would embrace it and implement programs in other community schools.

Rotary Club of Ann Arbor ~ International Humanitarian Project: Sri Lanka Irrigation

■ *Fred Beutler*

Forty farming families in a remote inaccessible hamlet in Sri Lanka were the beneficiaries of a self-sustaining project partnered by the Rotary Club of Colombo Fort and the Rotary Club of Ann Arbor. Farmers in this area are deprived of rain most of the year, and are dependent on reservoirs during the dry season for the cultivation of their rice crop. Through this project, an ancient irrigation reservoir was rehabilitated, and tank capacity increased by 40 to 50 percent. The land now yields two harvests annually, significantly increasing the income of all the families. This was the second such project undertaken by the two clubs.

The project was directed by Nishta Bhatia with the help of Dave Schmidt and Harvey Grotian of the Rotary Club of Ann Arbor. Project lead for the Colombo Fort Club, was Abhaya Panditharatne. The Rotary Club of Ann Arbor contributed \$2,875, with additional contributions by the host club, the district, and Rotary International bringing the total project cost to \$12,250.

Ann Arbor North Rotary Club

The Ann Arbor North Rotary Club continued their long-term involvement with Green Baxter Court by taking a group of very excited kids to a local pumpkin patch. They were able to go on a hay ride (twice!), play in the straw maze and of course enjoy some cider and pumpkin doughnuts. A real highlight was the opportunity for each child to pick his or her own pumpkin right from the pumpkin patch. The Rotarians enjoyed the day as much as the kids, especially as they saw and heard the enthusiasm and appreciation expressed by the young people who participated. For some it was the first time they had ever seen a horse other than in pictures. For all it was a great day!

Rotary Club of Ann Arbor

■ submitted by Ingrid Sheldon

All around Washtenaw County, Rotary clubs are celebrating the holiday season with special dinners and parties, including remembering local residents in need.

The Rotary Club of Ann Arbor continued its near-50-year tradition of hosting the Ann Arbor Pioneer High School A Cappella and Bel Canto choirs for a holiday luncheon concert. The event is well-attended by members, spouses, and community guests. The choirs represent a nationally acclaimed music department and presented works by Biebl, Clausen, DiLasso and Mendelssohn.

The current director, Steven Lorenz, continued the tradition of recently retired and Honorary Paul Harris Fellow Dr. Kenneth Westerman and prior to him, Robert Pratt, 1977-78 Ann Arbor Rotary President who passed away this past year.

The closing, "Winter Time Aglow" always reminds those in attendance of this special season of the year as we celebrate our friends and community.
