How to Translate the website very easily to French(and other languages)
## Now EVERYONE can read the District website!

To translate a website easily, follow the steps below:

1.   Open up the following website in your browser:

     http://babelfish.yahoo.com/

2.   Look at the babelfish website and fill in the form. *You want to translate the web page, so it's the bottom section you fill in.*

3.   Complete the website and the language option.   (Th

4.   Click Translate.

You will see the following in-progress graphic:

Translation in progress...

The translation takes place in the same window. The French translation will very soon display.

NOTE: The site is best viewed with Internet Explorer, but Firefox will work too. *It appears that all other pages in the site will also be translated – not just the first page!*

The graphic below is from Firefox:

The graphic below is from Internet Explorer – slightly different, mainly in the menu along the top:
