2:10 pm: LAUGHTER SESSION – Dr. Sushil Bhatia

We are fortunate to have as our guest Dr. Sushil Bhatia, President of Laughter Club of America. This is another guaranteed enjoyable Conference feature.

Art of laughter is laughter without joke

While we use jokes to stimulate laughter, the ‘art of laughter’ is being creative and changing how we look at the dishes that life throws at us, and finding the funny side of those situations.

Through this method we learn that 10 seconds of laughter is as effective as 3 minutes on a rowing machine. This technique provides internal massage, reduces pain by releasing happy hormones, endorphins which provide temporary pain relief and overcome negative emotions related to illness.

Art of Laughter guides us to “THINK NEUTRAL and focus on MOM* helping to improve our immune system, help with chronic breathing problems and reduce stress resulting in happiness, relaxation, improved memory and being more alert.

*MOM= Managing Of Mind.

Dr. Bhatia is an innovator/Entrepreneur and a professor and Executive in Residence Emeritus at Suffolk University, Boston. He teaches Innovation, new product development and Happiness courses. Sushil has innovated many everyday use products and has several patents to his name.
