

Not wrong, just different

Cherkasy Region – people with disabilities

**Life before and after - 24th,
February, 2022**

War in Ukraine

Statistical reference (in Ukraine and Cherkasy region there is no single database of information on people with disabilities, especially in terms of nosology, age, sex, location)

Officially before war in Ukraine – NGOs information:

UTOG organization - region 1200 members, city 600

UTOS - region 1000 members, city - 400

IDPs in the region - 12.000 people with disabilities, in Cherkasy city - 5.000 people

Data on people with disabilities are not available

From 24th, February, 2022 to 12th, May 12, 2022:

IDPs in the region - 120.000, including 3.000 people with disabilities

In Cherkasy city: 19.400 people, including 917 people with disabilities

People aged 50+ - 50%, women - 60%, children - 25%

At the end of 2021 in the Cherkasy region - 19.000 people with disabilities

In Cherkasy city - 6.400

Most displaced persons are from Donetsk, Luhansk, Kyiv and Sumy regions

There was and still is the problem of acquiring the status of a person with disabilities:

- difficult access for commissions for people from rural areas,
- the need to re-register every 2 years IPR (individual development program)

Thus, about 70% of people, especially the elderly, do not receive this proper status!

We can and want to work!

W2W Social Enterprise for sewing Ukrainian flags and eco-bags before the war, making camouflage nets now
We are doing everything possible and more for VICTORY

<https://www.facebook.com/100013885636701/videos/1184865545383888>

We equipped a shelters for IDPs with disabilities in the Center for Rehabilitation

Services of the NGO Perspective,
helping those who need such care (Charity Fund “Rodina LG”)

We need your help during this war in order to live, love, work and do everything for Victory!

The most acute problem was and remains:

dental treatment under general anesthesia and with a chair adapted to the needs of people in wheelchairs

The regional council made a positive decision on the allocation of the budget, but did not have time to find the money before the war

The cost of equipment is 20.000USD

Today it would be very important to organize a mobile dental clinic on the bus

Other needs:

- Diapers for adults - aree issuance ended on 1th, May, 2022
- Wheelchairs (with removable wheels, light; with an electric drive - it's just an expensive dream for many)
- Crutches, walkers, seats to the shower, bath, toilet lid

Limb prosthetics in Cherkasy on the basis of prosthetic and orthopedic shop works - but new modern equipment and training of new masters is required

People who are deaf (UTOG) need phones and tablets (the state compensates only in the amount of 100USD every 5 years

People who are blind and partially sighted (UTOS) also need phones and tablets - programs for blind NGOs are already set up independently

Need 5 laptops for the blind to work online at a volunteer center that helps people with disabilities

Lubricating catheters for patients with cerebral palsy and spina bifida, urinary and fecal intakes

Medicines and food

National specialized children's hospital «Ohmatdyt» of Ukrainian Ministry of Health

appeals to you to send us humanitarian help for the purpose of providing urological care for kids and adults affected by russian invasion

The list of consumables is attached bellow (needs for 1 year):

1. Catheter Nelaton 8,10 Ch (female and male)
