

DOES EVERY CLUB IN YOUR DISTRICT HAVE AN INTERNATIONAL PROJECT?

A key purpose of **Rotary International** is to provide humanitarian service and to advance goodwill and peace around the world but many international projects can take years to complete.

Disaster Aid can help any club be involved internationally in your year through a “**Safe Water for Every Child**” SkyHydrant Installation.

WHY WATER?

Children who have limited immunity from infection are those at greatest risk from water born diseases.

Globally, an estimated **1,800 children** under the age of five die **every day** from disease linked to contaminated water.

Probably the greatest humanitarian service is to ensure that people have access to safe drinking water.

Not only does it protect people’s health, but the strong appreciation of the benefit by the recipients builds a reservoir of goodwill to our donors.

If a club in your District wants to get involved in an international project suggest they contact Disaster Aid

Why Disaster Aid

Some of the reasons to talk to us are:

- **International Partners;** We have strong links with Rotary and Non-Rotary organisations, that install our Skyhydrants at the lowest possible cost.
- **Projects Ready to Go;** We currently have a list of over 100 schools in Bhutan and the Philippines that need Safe Drinking Water.
- **Proven Technology** The SkyHydrant removes 99.999% of all Bacteria in water sources.
- **\$5,000 will sponsor a SkyHydrant Installation;** This delivers an International project that make a real difference to a community of over 500, or over 1,000 children.
- **Opportunities for an Ongoing Relationship;** Our 'Safe Water for Every Child' installation can be the first step of a long-term relationship between your club and a school, or community, in a developing country.
