

Designed by Rotarians ... For Rotarians!

ClubRunner is the leading software provider for Rotary clubs and districts worldwide.

Already in use by thousands of Rotary clubs and districts, ClubRunner offers robust database management for clubs and districts, in conjunction with attendance reporting, event and volunteer management, website and directory support and e-communication services. In use for over 7 years, ClubRunner is a proven, mature software solution for clubs and districts looking to implement an online, database driven membership management system.

In use by 7 of the first 10 Rotary clubs, and numerous large clubs such as Los Angeles, Boston, New York, Sacramento, Oakland, Toronto, and San Francisco, ClubRunner is designed not just for large clubs but is suited for and used by small and medium sized clubs. In addition to database management, ClubRunner is designed to improve membership retention and growth, public relations and image, and the efficiency of a club's overall functions..

Our Brief History

ClubRunner celebrated its 5th year anniversary in April of 2008, but many customers today may not know our history. Started in District 7080 in Ontario, Canada, ClubRunner began as a project by the District 7080 Internet Chair Adel Asterbadi, a long time Rotarian and Past President of the Mississauga City Centre Rotary Club. As a software provider for major banks and insurance companies, his company, Doxess Technologies (ClubRunner's parent company), was already adept at using the latest technology to manage online databases, generate dynamic documents and perform time saving work flow functions within an organization. Working closely with District 7080 and the Mississauga City Centre Rotary Club, he took this experience and adapted it to the way Rotary clubs work. After creating a district version, the club and zone version soon followed.

The need was so great within Rotary that ClubRunner expanded quickly to span all **seven continents worldwide** with the most clubs in the United States, Canada and Australia.

Today, ClubRunner is continuing its investment into the Rotary community, and is constantly updating and adding new features to enhance the suite of club operations and administration. In fact, **ClubRunner is the first and only vendor to have integrated its databases with Rotary International** such that clubs can spend less time with administration tasks and more helping the community. The RI Integration allow for automatic updates in RI's database while maintaining full control and privacy to Rotary Clubs and Districts. ClubRunner shares a close relationship with Rotary International to better align its direction with the future vision of Rotary clubs and districts, and streamline the flow and accuracy of data. With the largest user base of any software company within Rotary, ClubRunner is leading the way with its state of the art service. A Microsoft Certified Partner, ClubRunner is based on the industry standard .NET platform, the most widely used system for large, enterprise level websites. This platform is what has enabled ClubRunner to grow at a **100% growth rate every year since its release in 2003.**

The ClubRunner Advantage

A Complete Package for Rotary...

ClubRunner is a complete platform for all levels of Rotary, including Clubs, Districts and Zones, with full data integration. As a complement to all 3 levels, MyEventRunner™ manages complex event registrations and payment and integrates with the ClubRunner database. ClubRunner is integrated with the RI database to synchronize updates automatically whenever changes are made at any of the 3 levels, thereby completely eliminating the need to duplicate any data entry.
