

Beehives in Rural Zambia

The Columbus Morning Rotary Club calls to other Rotary clubs for help in an effort of reducing deforestation and provide remote villages with self-sustaining agricultural practices in Zambia!

Kyle, the son of a local long time Rotarian, and his wife Katherine met in the Peace Corps and now, through their passion of helping others, are moving on to their next mission; helping local village economies develop and preventing deforestation in Zambia Africa.

The couple presented their latest vision to the Columbus Morning Rotary Club on helping the bee farmers in remote areas of Zambia by providing long lasting beehives instead of the previous traditional methods of cutting down trees and hollowing them out. Not only is it more advantageous for the ecosystem, it is also safer for the farmer.

Kyle and Katherine have lived in Zambia for 4 years and provides the direct support need for a successful project. The Columbus Morning Rotary Club has raised \$250 to provide 10 beehives for this cause and now we also ask for your support to do the same!

Bryan Chochon
2018-19 Columbus Morning Rotary Club President
