Approved	GG1867690	Water for the Nuevo Progreso, and Choccol communities in Santa Lucia, Guatemala	According to the data and reliable studies Lake Atitlan is one of the most beautiful and endangered lakes in the world. The top layer of the lake is eutrophying quickly and is no longer suitable as a source of potable water. We have worked with the 19 municipalities in Sololá to identify the most critical needs. In terms of water the two needs are access to safe drinking water and effective waste treatment for everyone living in the Atitlan watershed. This project will focus on the uppermost municipality in Lake Atitlan's watershed, Santa Lucia Utatlan. We will improve existing wells, and provide potable water and wastewater for two communities in Santa Lucia.	4/11/2018	Not 5170		Watsonville	\$82,250
