Submitted	GG1758753	Water purification of the aqueduct system of Vereda El Carmelo in La Plata Huila.	Verada El Carmelo is a community of 120 households, about 600 residents and a school serving 250 students situated on a steep slope near a permanent creek. About 30 years ago a water system was constructed but has deteriorated badly and is in imminent danger of failing. Due to the high demand of water supplies in the lower part of the system, the water pressure has increased causing pipes to burst and residents to leave their taps open to mitigate the problem. The water at the intake is contaminated with E Coli.	5/6/2017	Peter Sherris	psherris@mac.com	Oakland	
Draft	GG1756853	"GOLFO SAN JORGE CARDIOPROTEGIDO"	En la actualidad, las enfermedades del corazón y los incidentes cardiovasculares que una persona puede sufrir, se cobra anualmente gran cantidad de vidas.	4/5/2017	Peter Anderson	pacificgeo@aol.com	Morgan Hill

Approved	GG1867690	Water for the Nuevo Progreso, and Chocel communities in Santa Lucia, Guatemala	According to the data and reliable studies Lake Atitlan is one of the most beautiful and endangered lakes in the world. The top layer of the lake is eutrophying quickly and is no longer suitable as a source of potable water. We have worked with the 19 municipalities in Sololá to identify the most critical needs. In terms of water the two needs are access to safe drinking water and effective waste treatment for everyone living in the Atitlan watershed. This project will focus on the uppermost municipality in Lake Atitlan's watershed, Santa Lucia Utatlan. We will improve existing wells, and provide potable water and wastewater for two communities in Santa Lucia.	4/11/2018	Not 5170		Watsonville
