

## GUIDED TOURS

We are offering guided tours to 3 different organizations that underscore our theme in active solutions in green transportation, policy, technology, practice and equity.

Here are 3 tours and ask you to choose one.

- 1) Valley Transportation Authority's new multimodal Berryessa BART Station.
- 2) Caltrain's just-finished overhead catenary system, at the San Jose Diridon Station, for their new electric trains; and
- 3) Tesla's massive, state-of-the-art Fremont manufacturing facility.

Buses will be available to take you on the tour you choose, and back to the Board of Supervisors Chambers.

The tour leaves at 2 pm and return is 5 pm

Each bus has 45 people capacity, so sign up when you register “live” for the event
