"KEROSENE-FUELED WICK LAMPS...ARE A SIGNIFICANT SOURCE OF BLACK CARBON EMISSIONS. REPLACING THESE LAMPS WITH CLEANER LIGHT SOURCES WOULD BENEFIT PEOPLE'S HEALTH AND THE PLANET."

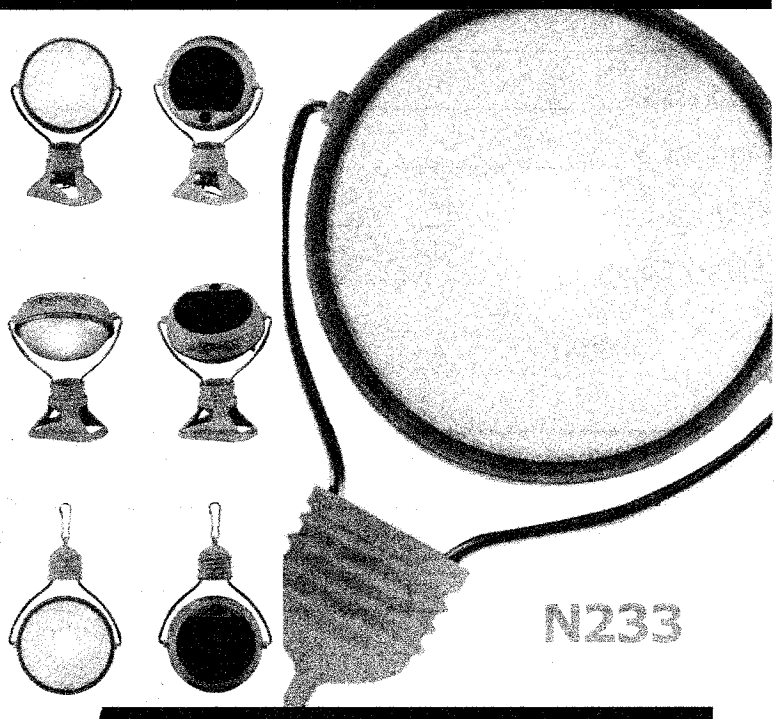

US NATIONAL INSTITUTE OF HEALTH (NIH) STUDY ON KEROSENE LAMPS

Nokero's N233 packs performance into a small package. Use it for reading, walking the dog, lighting a tent, at a dinner party, or during a power outage--this is where sustainability starts.

Industry-leading (patented) solar circuitry provides fast charging. The N233 delivers up to 15 hours of light per day's solar charge.

With over 1.7 million solar lights sold across the globe, we know how to make the best. Designed and tested in Colorado to withstand years of daily use in the harshest conditions. Our quality is a characteristic that made Nokero a global leader in off-grid electrification.

Nokero has set a new standard for quality, performance and value. With a 5-year life and 2-year warranty, the N233 is leading the solar revolution.

FEATURES

- Highest efficiency integrated 0.26 watt solar panel
- Industry-leading efficiency circuitry, patented
- Long life 3.2v LiFePO battery, 5-years
- Durable and weatherproof
- Hanging design for charging or area lighting
- Freestanding for charging or tabletop task lighting

SPECIFICATIONS

- Lithium iron phosphate battery (3.2 V, 500 mAh)
- 25 Lumens, 6 Hours run-time (10 Lumens, 15 Hours)
- 0.26 watt integrated solar panel
- SunPower solar cells with EVA / PET encapsulant
- ABS housing, UV-stabilized color
- Polycarbonate globe, impact resistant
- 1pcs 25 lumen LEDs (200 lumen / watt efficiency)
