

Preserve Planet Earth Award

Water Bottle Refilling Stations in Schools Boulder

The Preserve Planet Earth Award recognizes the Rotary club that has made a new, significant contribution to sustaining our environment.

Again tonight, we are honoring Boulder Rotary for their Water Bottle Refilling Station project!

Preserve Planet Earth (PPE) believes environmental sustainability and stewardship is a critical component for peace and coexistence of people and their surrounding natural environment.

The Project partnership between the Boulder Rotary Club and the Boulder Valley School District has provided for a Project, which exemplifies this beneficial endeavor.

Thank you for helping to sustain our Planet!
