

April is Maternal & Child Health Awareness Month. As one of the 7 Areas of Focus, Rotary makes high-quality health care available to vulnerable mothers and children so they can live longer and grow stronger.

An estimated 5.9 million children under the age of five die each year because of malnutrition, inadequate health care, and poor sanitation..... all of which can be prevented.

Rotary provides education, immunizations, birth kits, and mobile health clinics. Women are taught how to protect themselves and their children from disease.

How can we/you impact the lives of Mothers & Children? Consider supporting the Rotary Foundation and/or applying for a Global Grant. The Rotary Foundation reaches mothers and children in need by giving communities the help and training they need to take control of their own maternal and infant health care.
