

## TONY GILMORE

District Governor, 7870 (southern New Hampshire and southern Vermont)

*Tony will be speaking at the Conference about his work with Pure Water for the World to help bring clean water to Haiti. He has traveled to Haiti both before and since the earthquake. Tony will also lead a panel on Community Projects.*

Tony Gilmore, this year's District Governor of D-7870 in southern New Hampshire and southern Vermont, volunteers for Pure Water for the World as its media specialist and webmaster. He has traveled with Pure Water several times to Honduras and Haiti on humanitarian missions. He also led a Group Study Exchange Team to the Philippines in 2009. Tony is a multiple Paul Harris member and a Foundation Benefactor.

Tony was graduated from the University of New Hampshire and Brooks Institute of Photography. He served in Vietnam with the US Army as an ordinance lieutenant.

Tony has enjoyed a varied career in the printing business. He started in commercial printing in the pre-computer days with his own business in Concord, and later sold that firm and went to work for Compugraphic Corporation. Later, he managed sales for a Mac-based graphic design system, and he has been involved in marketing for the Southworth Paper Company, consulting and writing for printing trade magazines, and created an Internet-based job board, HireSkills.com, before he retired in 2008.

Throughout his career, his Rotary involvement has been a constant. He first joined the Rotary Club of Concord, NH, over 35 years ago. Career and scheduling changes took him to the clubs of Capital City Sunrise (Concord), West Springfield (MA), Sugarbush Valley (VT), and back to New Hampshire and Capital City Sunrise. And, if you run into Tony "making up" at one of the clubs in the Scarborough area of our District, he is probably here visiting his mother, who has a summer home on Prout's Neck.

Tony and his wife Liz now live in Hopkinton, NH, and they have two married daughters and several grandchildren. Not content to sit still, Tony has started a new business, World Digital Photography, that expands on his passion for photography for non-profits.
