END POLIO NOW

"We are **ACHINGLY CLOSE** to getting rid of polio — more than **99 PERCENT** of the way there. Finishing the job is a big challenge, but it is **VERY DOABLE** if we keep up the effort." — Bill Gates

FUNDING IS NEEDED TO ERADICATE POLIO

TOP 5 REASONS TO ERADICATE POLIO

There are fewer polio cases today than ever before, but we will not stop until we reach zero. We are This Close to a polio-free world, and we need your help.

Immunize

400 million children against polio every year.

Improve

the ability of surveillance and monitoring systems to diagnose new cases and detect the wild poliovirus.

Hire

more than 150,000 health workers to go door to door to find every child.

If polio is not eradicated,

hundreds of thousands of children could be paralyzed. Global health care costs will rise dramatically, and many children's quality of life will be drastically diminished.

Your donation will save lives and give a child a chance at a prosperous future.

1

To improve lives.

16 million people are walking today who would have otherwise been paralyzed.

2

To invest in the future.

If polio isn't eradicated, within 10 years, as many as 200,000 children could be paralyzed by it each year. A polio-free world will be a safer world for children everywhere.

3

To improve child health.

Polio surveillance networks and vaccination campaigns also monitor children for other health problems like vitamin deficiency and measles, so they can be addressed sooner.

4

To save money.

A polio-free world will save the global economy \$40-\$50 billion in health costs within the next 20 years.

5

To make history.

Polio eradication would be one of history's greatest public health achievements, with polio following smallpox to become only the second human disease eliminated from the world.
