Study Title: Awareness of Rotary Club

Study Period: May - June 2024

Study Location: Randomly selected enumerator areas in the Greater Kampala Metropolitan Area (GKMA) districts of Kampala, Mukono and Wakiso.

Report date: July 2024

1. Introduction

This report provides an overview of the fieldwork process, highlighting any challenges encountered and their resolutions. This report's primary references are training and field reports from supervisors.

Hatchile Consult Ltd conducted a survey about the perception of the Rotary or Rotary club, employing a single investigation question which read; "What do you think of when you hear the term rotary or rotary club"? The study area included the districts of Kampala, Wakiso and Mukono, targeting a study population comprising of adult Ugandans aged 18 years or older at the household. The question item was translated as "*Kiki ekikujira mu birowoozo bw'owulira ekigambo lotale oba lotale kiraabu?*". It was conducted in randomly selected urban, peri-urban and rural enumerator areas following a random selection of 2000 adult residents from 200 enumeration areas, proportionally allocated across the study districts based on the 2014 census household count as the measure of size.

The survey question on perceptions of rotary was embedded in a larger n=2000 survey on democracy, gender and political participation in the districts of Wakiso, Mukono and Kampala. The survey question was placed right at the end, after all substantive and demographic items were concluded.

To prepare for interviewer training, both a sample of enumeration areas and the English question were set out and put in the main survey electronic data collection SurveyToGo/STG program. Before training interviewers, the English version of the question was translated into Luganda (the dominant local language in the study area). The translation was further refined through discussions and approval by Dr. Peter Mwesige and finally put in the final questionnaire of the main survey.

2. Methodology

2.1 Brief on study design

The study employed a quantitative design at the household level, targeting adult (18 years or older) respondents, using a structured interview guide. The survey tool was deployed via SurveyToGo, the electronic data collection platform Hatchile Consult uses, to increase efficiency and accuracy through its near real-time data checks, collation and quality assurance features.

2.2 Sampling

The sample was distributed across the three districts of Kampala, Mukono and Wakiso proportionally based on each district's total number of households (as of the 2014 census and its projections), as the measure of size. A total of 200 villages were randomly sampled within the study area (see Annex 2 for the list of selected villages). Each village or enumeration area was allocated ten respondents, composed equally of five men and five women. The total sample size was 2,000 participants, split equally between male and female respondents.

2.3 Field Teams

The fieldwork was conducted by 16 teams, between 7 – 14th June 2024, with each team consisting of two enumerators and one team supervisor. The overall field team included:

- a. 32 Field Workers (Enumerators)
- b. 16 Team Supervisors
- c. 3 Quality Assurance Managers
- d. 2 Data Managers
- e. 3 Survey Management Team members at the head office

2.4 Fieldwork Schedule

Each team was tasked with covering two villages per day over six days, from 7th June to 14th June, conducting interviews in one village during the morning and another in the afternoon. This approach allowed each team to complete 20 interviews per day, ensuring a balanced gender representation of 10 men and 10 women per village.

2.5 Data collection Supervision and Quality Assurance

A three-tier survey management structure was adopted. The team leader was the first line of quality assurance, managing 2 interviews and cross-checking that all samples and interviews are administered as per the agreed protocol. There was a total of 16 team leaders. The second tier included 3 senior quality assurance managers, each responsible for a minimum of five teams. Senior quality assurance managers assisted team leaders with methodological issues, as well as obtaining advance clearance with local leaders.

The third tier was the survey management team at the head office. This included two data managers, two HR officers and the managing director. The survey management team ensured that and approval to access sampled areas.

3. Training of Interviewers

Training of enumerators took three (3) days from 29th through to 31st May 2024 at Namirembe Resource Center (NAREC), Kampala. The co-investigator Mr. Francis Kibirige, facilitated at the opening day of the training, taking the team through the purpose, design, and tools for the study, and also answered questions arising from the pre-test.

The rest of training content mainly comprised a review of the questionnaire, a discussion of the sampling design and approach, the use of tablets for data collection and a review of local translations. Interviewers were also taken through ethical considerations in research, confidentiality and informed consent. A half day was dedicated to field practice to test the questionnaire, the translations, and the sample design on Friday 31st May 2024. The pre-test was reviewed on the afternoon of the 31st May 2024, where the field team shared insights on what worked and what didn't, as well as challenges faced and solutions.

4. Data Collection

4.1 Interview Process

Structured interviews were conducted with adult Ugandans (men and women) aged 18 years and above within randomly selected households. Each team alternated interviewing men and women to maintain gender balance.

4.2 Tools and Technology

The survey tool was administered via the SurveyToGo platform, ensuring near real-time data quality checks and collation. Data were reviewed on a rolling-basis, with teams briefed each morning of any issues for address.

5. Data Management

Data managers checked the collected data daily to ensure completeness and accuracy. Any discrepancies or issues were addressed promptly to maintain data integrity.

6. Participant Compensation

Participants were compensated with a token of mobile money amounting to 5,000 Uganda shillings for their time and contribution to the study.

7. Challenges during fieldwork

- a. Some villages posed difficulty to access due to poor road conditions, but all were reached.
- b. One EA (Musajja Alumbwa, Kampala Central Division) replaced Budonian, Kampala Central Division) due to very few households in the EA, as part of the infrastructure development in the area.
- c. In some cases, the team had to remain in the EA much longer in the evenings to increase the chance interviewing the selected respondents,
- d. Some participants were busy, and led to much longer interview sessions.

8. Success of the fieldwork

The success of this fieldwork was largely a result of working together with fieldworkers who were engaged in the exercise. The interviewers worked together with their respective leaders and together planned ahead of time and often discussed field strategies together. Team members also were good at time management which helped them to do the required interviews needed in the day. The availability of route plans helped the interviewers' movements from an EA while collecting data. In many instances, the respondents were quite interested and engaged in the survey.

9. Research Permission

This study was reviewed and approved by TASO research ethics review committee (local IRB) for ethics approval. TASO REC is an accredited Ugandan based Research

Ethics Committee (REC) that is supervised by the Uganda National Council for Science and Technology (UNCST),

10. Conclusion

Despite encountering challenges, the fieldwork achieved its goals through a well-trained team, effective data collection methods, and strong team collaboration. In conclusion, therefore, despite of challenges faced while collecting data the general implementation of the survey was good and the field experience in particular was as per expectations. Participants also met with different leaders and people in different communities.

Annex 1: In-house Fieldwork Implementing Team

1. **Moses Kyagulanyi**, Manager, Finance & Administration.
2. **Ann Maria Alibazewa**, Finance disbursements and logistics management
3. **Muhammad Ssenkumba**, Researcher and data analyst.
4. **John Ssebunya**, Data/ Quality Assurance Manager.
5. **Ategeka JAK**, Researcher and Quality Assurance Manager.
6. **Dr. Kayanja G.W**, Researcher and Quality Assurance Manager.
7. **Pius Tibaingana**, Quality Assurance Manager.
8. **Angella Nakasujja**, Communications Officer/Field team supervisor.
9. **Carol Nakayiza**, M&E and Sampling Assistant/Field team supervisor.
10. **Dorah Babirye**, M&E Officer/Field team supervisor.
11. **Madrin Namubiru**, M&E Officer/Field team supervisor.
