

The Tree Peony Project

Community Beautification
to benefit the Rotary International Foundation

Get your tree peony by emailing DG Peter at
peterf7150@gmail.com

\$20/plant and half goes to the RI Foundation

What are tree peonies? They are easy to grow, woody shrubs that produce striking, satiny blooms of red, pink, white and purple. These ones are imported directly from Dalkanjima, Japan; the world capital of tree peonies.

Help beautify your garden or local community while giving back to the Rotary Foundation!

Planting: You can plant them in April, May and June. The white, pink, red and purple plants are 2-years old. Planting instructions will come with each plant.

Seedlings are hardy, but keep them in a cool place like a basement or garage. Do not let them freeze - that could kill them. Once planted in the ground, you no longer have to worry about frost. In fact, the colder the winter, the bigger the flowers they will bring in the spring! Tree peonies are very hardy, deer resistant and rabbits do not like them. You may have flowers from 2 years old. It will take 5-6 years to mature and produce 10 or more flowers. They are growing and long lasting gifts, great for housewarming and Mother's Day.

The Tree Peony Beautification movement started in District 7170 (the southern tier of NY) and their goal is to make it a national project with a National Tree Peony "Botan" Road that stretches from San Francisco to Boston!
