Subject: Global Grant Proposal for Mammography & Medical Van

Date: December 4, 2018 at 10:10:27 PM PST

To: RotaryJackArney@gmail.com

Dear Governor Jack Arney,

Greetings from India !

One of the Club in our District 3011 (Delhi NCR in India) desires to have the project of Mammography Van and looking for foreign partner. Please let me know if your district/club is interested for the Global Grant Project.

Below is a brief proposal including the finances.

Regards

IPP Rtn Lokesh Gupta

PROPOSED GLOBAL GRANT PROJECT

GRANT TITLE- MAMMOGRAPHY CUM MEDICAL VAN

PROJECT OVERVIEW- INDIA IS A DEVELOPING COUNTRY AND FARIDABAD IS INDUSTRIAL TOWN IN THE VICINITY OF THE NATIONAL CAPITAL-NEW DELHI. FARIDA AND PALWAL ARE TWO DISTRICTS IN HARYANA WITH 426 VILLAGES & 3.1 MILL POPULATIONS. THERE ARE MANY SLUM AREAS IN FARIDABAD AND INDUSTRIES WHERE MOSTLY FEMALE EMPLOYEES ARE WORKING. BREAST CANCER CASES ARE FOUND TO BE SPIRALING WORLD OVER AND INDIA IS NO EXCEPTION. INDIA'S HEALTH PROJECTIONS PREDICTED THAT BY 2020 BREAST CANCER WILL OVERTAKE CERVICAL CANCER AS THE MOST COMMON TYPE OF CANCER AMONG WOMEN IN INDIA AND NUMBER TO GO HIGH TO 1,797,900. EARLY DETECTION AND SCREENING IS THE BACKBONE OF TREATMENT. MAMMOGRAPHY PLAYS A CENTRAL PART IN EARLY DETECTION OF BREAST CANCER. USE OF SCREENING MAMMOGRAPHY INCREASES THE CHANCES OF DETECTION OF SMALL ABNORMAL TISSUE GROWTHS CONFINED IN THE BREAST WHICH MAY OTHERWISE NOT BE DETECTED ON PHYSICAL EXAMINATION. EARLY RECOGNISING OF CANCER THROUGH SCREENING AND AWARENESS IS A BIG TOOL TO REDUCE MORTALITY DUE TO CANCER. IN INDIA MOST OF THE WOMEN IN RURAL AREAS ARE NOT AT PAR WITH MEN AS FEMALE PREVENTIVE CHECK UPS ARE CONCERNED AND DUE TO ILLITERACY AND LACK OF AWARENESS ABOUT THE EARLY DIAGNOSIS OF THE CANCER AND HENCE DELAY IN EARLY DETECTION AND PROPER TREATMENT. MOST OF THE PATIENTS REPORT TO HOSPITAL AT THE ADVANCE STAGE AND HENCE WE LOSE THE CHANCE TO CURE. KEEP THESE THINGS IN MIND, THE MEMBERS OF ROTARY CLUB DECIDED TO PROVIDE A MOBILE MAMMOGRAPHY UNIT WHICH WILL HAVE FACILITIES OF MAMMOGRAPHY (FOR EARLY DETECTION OF BREAST CANCER), FACILITIES TO TAKE PAP SMEAR (SCREENING OF EARLY DETECTION OF CANCER OF CERVIX) AND PORTABLE X-RAY MACHINE. THIS MOBILE UNIT WILL GO TO THE VILLAGES, SLUMS AND URBAN AREAS WHERE THERE ARE NO FACILITIES FOR THESE INVESTIGATIONS. OUR TARGET AREAS ARE FARIDABAD AND PALWAL DISTRICTS.

WE WILL ALSO COVER OFFICES AND INDUSTRIES WHERE MOST OF THE EMPLOYEES ARE FEMALES AND DUE TO SCARCITY OF THE TIME THEY POSTPONE THE PREVENTIVE CHECK UPS.
