Malaria Vaccine Update

- “With each step a flower grows” - the Toxicology Tests on the vital Malaria Vaccine have been returned all clear., to our local developer, Griffith University, Gold Coast. It is a user-friendly, freeze dried, world first version of the vaccine. The next step will be human trials. We have three district Ambassadors available to speak to Rotary Clubs or any other community group at any time. Malaria is a most deadly disease and this is a crucial, developing response. Please just ask for an update presentation by contacting myself on email: rossatburleigh@gmail.com
