

**District** 7040  
**Grant Number** DG1846250

<b>Club</b>	<b>Type</b>	<b>Description</b>	<b>Location</b>	<b>Amount (USD)</b>
West Ottawa	Education: literacy	<p>The purpose of the project is to provide a gift of a Dictionary4Life (D4L) to grade 3 youth in 35 -38 supported schools in the Greater Ottawa area, Prescott, Kingston-Waterfront, Napanee, Montreal-lakeshore, Cornwall-Sunrise, Eganville, Smiths Falls, and Arnprior and several Ottawa homework clubs in District 7040. It is again hoped/anticipated there will be further expansion to other clubs prior to the December 2017 book order. The Dictionary4Life has been described in past DSG applications (<a href="http://www.dictionary4life.com">www.dictionary4life.com</a>). A new aspect to the project was initiated by West Ottawa Rotarian Ron Doll. He is working to encourage the development of partnerships between clubs and indigenous school populations through presentations about D4L.As the lead club for Dictionary4Life we want to support the District literacy efforts including, 1. To increase our club efforts in support of local literacy.2. To encourage other clubs to support local literacy by using the Dictionary4Life as a new project.3. To encourage ourselves and other clubs to enhance/ augment/ strengthen their local literacy projects with, for example, Ottawa Reads; book donations.4. To offer overall management of the expansion of the Dictionary4Life project to other District clubs.</p>	Canada	2,500
Watertown	Water: sanitation	<p>Dodge Pond wishes to replace one privy at Site 3. Currently, Dodge Pond has four privies; two have been replaced, including one with support from a Rotary District Grant in 2014-15. With this grant, a third privy will be replaced. The new privy at Site 3 will be built like the other privies that have been refurbished. It would be six feet wide and nine feet long, with two sinks, two mirrors, one outlet, and one toilet seat. Four out of the nine feet would be a “screened porch” where the two sinks and supplies would be stored. Texture 111 would be used for siding and brown tin would be used for the roof to match the 24’ x 40’ pavilion onsite. The project aligns with Rotary’s areas of focus on sanitation and education.</p>	United States	468
Renfrew	Water: sanitation	<p>The wheel chair accessible Splash Pad Renfrew Rotary installed a number of years ago has been heavily used by the community. There are no washroom/latrine facilities nearby; this project addresses this need.</p>	Canada	1,250

Petawawa	Community development: general	<p>The Petawawa Pantry Project is to obtain, supply and install moveable and adaptable shelving along with two upright freezers. The Pantry is in a strip mall in the heart of Petawawa which enables easy access to the residents in need. The objective of the Rotary Club project is to provide the Board of Directors of Petawawa Pantry with tools to assist in fulfilling the needs of residents of Petawawa who require community support for adequate food and nutrition.</p> <p>Supporting the Petawawa Pantry fulfils two Rotary areas of focus &gt; Disease Prevention and Treatment and Maternal and Child Health. These areas of focus are completed by providing the opportunity to supplement basic nutrition for seniors, young mothers with children and indeed any resident of Petawawa who from time to time need community help.</p>	Canada	925
Ottawa Bytown	Community development: general	<p>Providing a new two-oven stove will enable the St. Mary's Residence to continue preparing food for mothers and children who reside in the home. The project will address the community need to provide support to young parents and their children. At the same time, young mothers would be able to learn to prepare healthy meals for themselves and their children.</p> <p>St. Mary's Residence operates on a very limited budget. It is desperately in need of a new stove. The support of Rotary in purchasing the stove will mean that St. Mary's can use their limited funds towards other needed endeavors.</p> <p>This project will also involve a learning component. Our Club is planning to host a lunch where we will provide guidance to the young parents on the importance of healthy eating habits and cooking skills.</p>	Canada	611
Montreal-Lakeshore	Education: general	<p>This is part of a project that will provide a school computer, a filing cabinet, library desk and 2 basic desks to "Creating Opportunities for Guatemalans" organization. It will also provide water purification units to 20 households and 6 composting toilets and 24 propane stovetop burners with tables to households of participating families.</p>	Guatemala	6,700

Massena	Community development: general	1. To provide hot water for the bath program that serves over 1,000 members of the Working Boys Center-Family of Families in Quito, Ecuador. 2.To provide funds for the cost and installation of 4 hot water heaters. 3.To provide funds for cost of labor associated with the installation to the old system. Upon receipt of approval and respective funds for the project, and under the supervision of the host Rotary Club of Quito Sur, Ecuador, the water heaters will be procured and installed locally.	Ecuador	8,450
Kingston-Frontenac	Community development: general	This project is located in Murutunguru Ward, Ukerewe Island, Tanzania. Chicken kits are made available to groups of 6 farmers to start chicken and egg operations capable of supporting a family with high quality protein as well as a source of income to cover children's educational costs and other household needs. The kits include breed stock, materials for coop construction, watering and feeding equipment, vaccinations, feed to reach self-sustaining production levels, and training. The groups of farmers are chosen by community committees. Once each farmer reaches sustainable production levels, they start to pay back their portion of the chicken kits. These funds are then re-invested in another six farmers. Farmer groups will be set up in each village within the ward and then expanded horizontally within the ward as funds become available from either outside donations or repayments from earlier participants. Once the demand within this ward is met, the program can be expanded to the other 24 wards on the island. There are approximately 350,000 people on the island.The primary objective of this initiative is to introduce income generating businesses that can bring cash into the subsistence farming community. Cash is necessary for many essential services including education, health care, clean water, and improved nutrition. Each chicken farmer will in turn create demand in related industries including feed supply (grain farming), transportation, construction, and other related industries. Gananoque	Water: supply/access	<p>Improve the quality and increase the amount of potable water for human consumption and home use for all members of the community. Improve the health of the habitants and especially the children. Contribute to the reduction of cases of diarrhea and other diseases related to contaminated water. Make more potable water available on a year round basis. The project consists of drilling a well to a depth of approximately 120ft. This will be a bore hole of 8" in diameter. When water is obtained a submersible pump will be installed to pump the water to the pump house. From there the water will be chlorinated and distributed by PVC pipe to the existing water tank. A subcontractor will be given the contract to drill the well, and the installation of the equipment.</p>	Panama	8,625

Cornwall Sunrise	Community development: general	<p>The funds would allow to sustainably expand their emergency service program to provide program participants with a healthy meal made from whole foods every time they come for an Emergency Food Basket. It would also allow to integrate their volunteer and program participant meals on service days. This approach contributes to a de-stigmatized and inclusive environment where everyone participates as a community. The café space is welcoming, comfortable, and serves as a gateway to discovering what is happening both at the depot and within the larger community (in terms of programming and resources). The meals served within the café space serve several purposes. They provide a nourishing meal to Depot participants, act as a demonstration of a recipe using the ingredients available in the food baskets that week, and they act as point of friendly conversation and relationship building between staff, volunteers, and program participants. Within this space program participants are also given the opportunity to share and contribute to the depot by volunteering themselves. The healthy community meal program is one which invites members of our Emergency Food program and volunteers to participate with cooking and serving delicious and nutritious meals several times a week at the Depot. Participants have the chance to test and improve their skills, to share knowledge and experiences with peers, and to taste and learn more about making healthy and affordable food in a safe and empowering space.</p>	Canada	1,850
