District grants give Rotarians freedom in determining how to best spend funds donated to The Rotary Foundation in their district. Each Rotary year, districts may apply for one district grant, which can be used to support one or more projects, based on that district's interests and needs.

The Rotary Foundation funds district grants with District Designated Funds (DDF). Each year, your district may request up to half of your available DDF, which in turn represents half of your district's Annual Fund donations from three years earlier. This system, known as SHARE, enables Rotarians to benefit from the short-term investment of their donation dollars.

Applying for a district grant is an easy, online process. Note, however, that the application requires specific information about your spending plan, bank account, and account signatories, so it's best to have this information available before you begin.

Also note that district grant applications must be authorized by the district governor, district Rotary Foundation committee chair, and district grants subcommittee chair. Before starting this application, please ensure that your district governor has identified these officers and that the officers have registered with Member Access.

In 2017 we applied for, and received, a District Simplified Grant in support of our Chicken Kits. While the Chicken Kits supported protein and cash generation for families, this program supports the development of an alternate staple grain within the community. Mlamba, or sorghum, along with the similar Finger Millet, are locally available but much less wide spread than maize and cassava. 2. The project involves the supply of complete "kits" for the farming of rabbits for meat and associated by-products to high schools in the Kilimanjaro region. It is our intent to engage 6 Rotary clubs, each engaging one high school, which must put forward a "champion" teacher to guide the project. We will supply the rabbit hutches, rabbits, feed, and training for a sustainable small business that can provide protein for the students and a potential source of income by selling the rabbit urine which is used as an organic pesticide	Tanzania, United Republic of	2500
