

NO MOW MAY

WHY?

→ **Creates habitat and forage for early season pollinators.**

→ **Benefits Our Community**

- ◆ Ensures survival of vital animal species including bees and other pollinators crucial to the health of our environment.
- ◆ Raises community awareness of how our food grows.
- ◆ Supports small, local businesses including native plant nurseries and pollinator-friendly landscaping.
- ◆ Addresses pest problems with fewer pesticides using integrated pest management.
- ◆ Heightens awareness of biological diversity.
