

Fellow Rotarians:

As you know water and sanitation , is a area of service, for RI and TRF. Many of us and our Clubs have been involved with water and sanitation projects for many years .

To help in the development or exploration of any projects WASH-RAG was established. We have projects from planning and concept through implementation throughout the world.

I have been appointed a WASH-RAG Ambassador for D7475. As such , my role is to assist Clubs and the District in exploring , supporting or developing a WASH project.

I am also involved with HANWASH. Established in 2018, it is involved with developing water and sanitation projects throughout Haiti. We have projects from ongoing operations to global grant applications pending.

I suggest that you visit the websites:

WASH-RAG.org

HANWASH.org

For more information.

I am available to meet virtually or in person if your Club is interested.
