PEACE PROJECT: POEM

THE MISSING PEACE

Interact

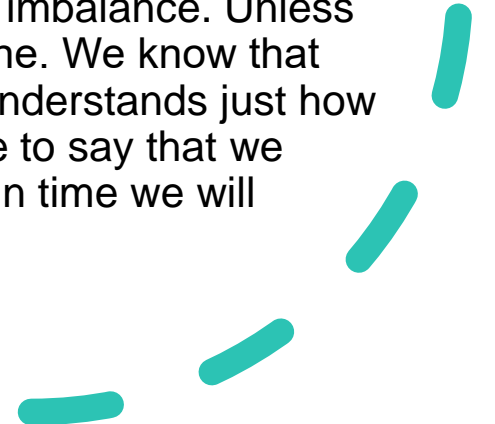

THE MISSING PEACE

Synopsis

- We chose this whole concept of playing on the words peace and piece to really emphasize that now more than ever peace is needed by humanity. It's missing from a lot of societies. This is evident from current events we've mentioned. We also kept mostly within events of this year so that someone reading or hearing it will be able to connect dots and be able to be impacted by the piece as all or most of these events would have been reported in one form or the other. They are more likely to feel empathy.
- This year is tough on all of us, some more than others and we at Interact are fortunate enough to be able to still have a platform and means to speak up about these issues that arise because of a lack of peace. Through our poem we want to encourage persons to empathize and realize our own blessings, and to actively advocate for peace not just on the 21st but every day until it can be said that it was truly achieved. We all know the peaceful way to be the good, right way, and it's easy to forget it because violence and unrest has become so normalized in our society. A key point we'd want people to note from our piece is that the way to achieve global peace is for everyone to be able to do so as individuals as if not there will still be that imbalance. Unless there is peace for all there can't truly be peace for one. We know that everyone at Interact and Rotary values peace and understands just how necessary it is and before we end, we would just like to say that we hope you encourage it, educate others about it and in time we will achieve it.

HAPPY
PEACE DAY!
